- Unpacking and Part Identification:** Carefully unpack all components. Lay them out and identify each part using the provided hardware and parts list.
- Frame Assembly:** Begin by assembling the metal frame components. Ensure all screws are finger-tightened initially, then fully tighten once the section is complete and stable.
- Reversible Design:** The desk can be configured with the longer section on either the left or right side. Plan your desired orientation before attaching the main desktop panels.
- Attaching Desktop Panels:** Securely attach the wooden desktop panels to the metal frame using the designated screws. Pay attention to the orientation of the panels, especially the corner piece.
- Installing Shelves and CPU Stand:** Insert the mesh shelves and CPU stand into their respective positions. The mesh shelf is adjustable to 2 positions to accommodate different storage needs.
