Step-by-Step Guide:

1. **Prepare the Base:** Connect two long metal tubes to two plastic connectors to form the base frame of a single tier. Ensure the tubes are fully inserted into the connectors.
2. **Attach Fabric Shelf:** Slide a fabric shelf over the assembled frame. The fabric should be taut.
3. **Add Vertical Supports:** Insert four short metal tubes into the top holes of the plastic connectors on the base tier. These will serve as the vertical supports for the next tier.
4. **Build Additional Tiers:** Repeat steps 1-3 to create additional tiers. You can create multiple individual tiers or stack them vertically.
5. **Stacking (Optional):** To create a taller rack, align the connectors of an upper tier with the vertical tubes of a lower tier and press firmly. Use the provided mallet to gently tap the

connectors for a secure fit.

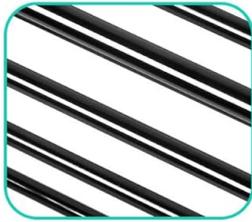

6. **Install Handrails and Hooks:** For the top tier, install the handrails by inserting them into the top connectors. Attach the hooks to the side handrails as desired for hanging items.
7. **Attach Side Pockets:** If included, attach the side pockets to the frame by sliding them over the vertical tubes.
