# Interphone QUIKLOX Support for BMW Navigator Mount - Instruction Manual

Model: SMQUIKLOXBMWCRADLE

## INTRODUCTION

This manual provides instructions for the Interphone QUIKLOX Support, designed for seamless integration with BMW Navigator mounts. This accessory offers a secure and convenient solution for mounting your smartphone on your motorcycle, featuring integrated anti-vibration technology and dual USB charging ports.

The QUIKLOX mount is engineered to perfectly fit the pre-installed navigation mount on compatible BMW motorcycles. It is compatible with all QUIKLOX phone holders, ensuring a secure attachment for your device. The integrated anti-vibration system is designed to reduce vibrations from the motorcycle engine, protecting your smartphone during rides.

For charging, the mount includes one USB Type-A and one USB Type-C port, both with IP66 waterproof certification. These ports are powered directly by the motorcycle's pre-installation, eliminating the need for additional wiring. The design allows for both horizontal and vertical orientation of your device, enhancing usability and adaptability to your navigation needs.

## 1. SETUP AND INSTALLATION

Follow these steps to install your Interphone QUIKLOX Support onto your BMW motorcycle's navigator mount.

### 1.1 Attaching the QUIKLOX Support to the BMW Navigator Mount

1. Ensure your BMW motorcycle has the pre-installed navigator mount.
2. Align the Interphone QUIKLOX Support with the BMW navigator mount. The design allows for a precise fit.
3. Gently push the QUIKLOX Support onto the BMW mount until it clicks securely into place.
4. Verify that the mount is firmly attached and does not wobble. The adapter is designed to lock and unlock with your motorcycle key, providing an additional layer of security against theft when parked.

## 2. OPERATING INSTRUCTIONS

This section details the use of the Interphone QUIKLOX Support's features.

## 2.1 Using the USB Charging Ports

- The mount features one USB Type-A port and one USB Type-C port.
- These ports are powered automatically when the mount is correctly installed on the BMW navigator mount and the motorcycle's ignition is on.
- Connect your smartphone or other USB-powered devices using appropriate cables to either the USB-A or USB-C port for charging.
- The ports are IP66 waterproof certified, meaning they are protected against dust ingress and powerful water jets. Ensure the rubber covers are properly sealed when not in use to maintain waterproofing.

## 2.2 Adjusting Device Orientation

- The QUIKLOX system allows for easy rotation of your smartphone between horizontal (landscape) and vertical (portrait) orientations.
- Simply rotate your phone holder and device to the desired orientation. The secure locking mechanism will hold it in place.

## 2.3 Anti-Vibration System

- The integrated anti-vibration system is designed to absorb shocks and reduce vibrations transmitted from the

motorcycle engine and road conditions.

- This system helps protect your smartphone's internal components, especially its camera, from potential damage caused by prolonged exposure to vibrations.

### 3. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your Interphone QUIKLOX Support.

- **Cleaning:** Regularly wipe the mount with a soft, damp cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners.
- **Inspection:** Periodically check all connections and the locking mechanism for any signs of wear or damage. Ensure the mount remains securely attached to the BMW navigator mount.
- **USB Port Covers:** Always ensure the rubber covers for the USB ports are properly sealed when not in use to maintain their IP66 waterproof rating.
- **Anti-Vibration Components:** Inspect the anti-vibration dampeners for any signs of degradation or cracking. While designed for durability, extreme conditions can affect them over time.
