3.2 Bluetooth Pairing

1. Ensure the controller is charged.
2. Turn on the controller.
3. Activate Bluetooth on your mobile device (iOS or Android).
4. On the controller, press and hold the pairing button (refer to the controller diagram for exact location) until the indicator light flashes rapidly.
5. On your device, search for available Bluetooth devices and select "GameSir X2s" to connect.
6. Once connected, the indicator light will become solid.

Note: For specific pairing modes (e.g., DS4 Mode), you may need to press the pairing button along with a specific face button (e.g., B button) initially, then hold the pairing button until the light flashes rapidly for the final pairing process. Refer to the GameSir App for detailed mode-specific instructions.

3.3 GameSir App (Android Only)

For Android users, the GameSir App provides personalized settings and calibration options for joysticks and triggers. It is recommended to download and use the app for fine-tuning your controller experience and

firmware updates.

4.4 Capture Screenshots

To capture screenshots while in PC or Android mode, press the dedicated **Capture button** on the controller. The screenshot will be saved to your device's gallery.

4.5 Cloud Gaming and Remote Play

The GameSir X2s is designed to work seamlessly with various cloud gaming and remote play services. Simply connect your controller via Bluetooth to your device and launch your preferred service, such as Xbox Cloud Gaming (Beta) with Xbox Game Pass Ultimate, PS Remote Play, NVIDIA GeForce Now, or Amazon Luna.

5. MAINTENANCE

To ensure the longevity and optimal performance of your GameSir X2s controller, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the controller. Avoid using harsh chemicals or abrasive materials. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.

- **Storage:** Store the controller in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** Avoid fully discharging the battery frequently. Charge the controller regularly, even if not in use for extended periods, to maintain battery health.
- **Avoid Physical Damage:** Do not drop the controller or expose it to excessive force.

6. TROUBLESHOOTING

If you encounter issues with your GameSir X2s controller, refer to the following common problems and solutions:

6.1 Connection Issues

- **Controller not pairing:** Ensure the controller is in pairing mode (indicator light flashing rapidly). Turn off and on your device's Bluetooth, then try pairing again. Make sure the controller is sufficiently charged.
- **Frequent disconnections:** Ensure there are no obstructions between the controller and your device. Avoid operating the controller too far from your device. Other wireless devices might cause interference; try moving away from them.
- **Incorrect pairing mode:** Verify you are using the correct pairing procedure for your device (e.g., specific button combinations for DS4 mode). Consult the GameSir App for detailed instructions if available for your device.

6.2 Button and Joystick Response

- **Input lag:** Ensure your device's operating system and the GameSir App (if applicable) are up to date. Minimize background applications on your phone.
- **Buttons feeling stiff or causing fatigue:** The controller's design is compact. For prolonged gaming, especially with D-pad intensive games, consider taking breaks. For 3D games, utilizing the right joystick can help distribute thumb usage.
- **Right stick too close to buttons:** This is a design characteristic. Adjust your grip or thumb placement to avoid accidental inputs on the right stick when pressing X and A buttons.

6.3 Battery Life

- **Short battery life:** Ensure the controller is fully charged before use. Battery performance can vary based on usage patterns and environmental factors. The controller uses 1 AAA battery (included).

6.4 Firmware Updates

Regularly check the GameSir App (Android only) for available firmware updates. Updates can address bugs and improve controller performance and compatibility.
