- To ensure the longevity and optimal performance of your CSODINCE charger, follow these maintenance guidelines:
- **Cleaning:** Disconnect the charger from the power outlet before cleaning. Use a soft, dry cloth to wipe the exterior. Do not use liquid cleaners or aerosols.
 - **Storage:** Store the charger in a cool, dry place away from direct sunlight and extreme temperatures.
 - **Handling:** Always grasp the plug when removing the charger from an outlet; do not pull by the cable.

TROUBLESHOOTING

If you encounter issues with your charger, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device not charging.	Charger not properly plugged in.	Ensure the charger is securely plugged into a live wall outlet.
	Faulty cable.	Try a different charging cable.
	Device incompatibility.	Verify your device is compatible with the charger's port type (USB-C or USB-A).
	Charger malfunction.	Test with another device. If the issue persists, contact customer support.
Slow charging speed.	Using a non-fast charging port.	For faster charging, use the USB-C (PD20W) ports with a compatible cable.
	Cable not supporting fast charging.	Ensure your cable supports fast charging (e.g., USB-C PD compatible).
	Multiple devices connected, distributing power.	Charging multiple devices simultaneously may reduce individual port speeds. Disconnect some devices for faster charging on critical ones.
Charger feels warm.	Normal operation under load.	A slight warmth is normal during operation, especially when charging multiple devices.
	Overload or poor ventilation.	If it becomes excessively hot, unplug immediately. Ensure adequate ventilation around the charger.
