Model: M243 | 22.2V, 2500mAh

1. Introduction

Thank you for choosing the MIUZZY Replacement Battery for your M243 Cordless Vacuum. This battery is designed to provide reliable and long-lasting power, ensuring optimal performance of your vacuum cleaner. This manual contains important information regarding the safe operation, installation, and maintenance of your new battery. Please read it thoroughly before use and retain it for future reference.

2. Safety Instructions

To prevent injury or damage to your battery and vacuum, always follow these safety precautions:

- Use only the original charger or a MIUZZY-approved charger specifically designed for the M243 vacuum battery.
- Do not disassemble, modify, or attempt to repair the battery. This can lead to fire, explosion, or leakage.
- Keep the battery away from heat sources, direct sunlight, and flammable materials.
- Do not immerse the battery in water or other liquids.
- Avoid dropping or subjecting the battery to strong impacts.
- Store the battery in a cool, dry place when not in use.
- If the battery shows signs of damage, leakage, or overheating, discontinue use immediately and contact support.
- Dispose of used batteries according to local regulations. Do not dispose of with household waste.
- This battery is equipped with built-in protection against overcharging, overheating, and short-circuiting.

3. Package Contents

Verify that all items are present in your package:

- 1 x MIUZZY Replacement Battery for M243 Cordless Vacuum
- 1 x User Manual (this document)

4. Installation and Setup

Follow these steps to install the replacement battery into your M243 Cordless Vacuum:

1. **Power Off:** Ensure your M243 Cordless Vacuum is completely powered off and disconnected from any charging source.
2. **Remove Old Battery:** Locate the battery compartment on your M243 vacuum. Typically, there is a release button or latch. Press the button and slide the old battery out.
3. **Insert New Battery:** Align the new MIUZZY replacement battery with the battery slot. Gently slide the battery into place until it clicks securely. Do not force the battery.
4. **Initial Charge:** For optimal performance, fully charge the new battery before its first use. Connect your vacuum to its charger.

5. Operation

Once the battery is installed and fully charged, your M243 Cordless Vacuum is ready for use.

- **Charging:** Connect the vacuum to its power adapter and plug it into a wall outlet. The charging indicator on your vacuum will typically show the charging status. A full charge may take several hours.
- **Usage:** Operate your vacuum as per its original instruction manual. The 2500mAh capacity provides extended runtime.
- **Battery Level:** Monitor the battery level indicator on your vacuum to determine when recharging is necessary.

6. Maintenance and Storage

Proper care extends the life of your battery.

- **Regular Charging:** Avoid completely draining the battery frequently. Recharge it when the power is low.
- **Storage:** If storing the battery for an extended period (more than one month), charge it to approximately 50-60% capacity. Store in a cool, dry place between 0°C and 30°C (32°F and 86°F).
- **Cleaning:** Keep the battery contacts clean and free of dust or debris. Use a dry cloth to wipe them if necessary.
- **Avoid Extreme Temperatures:** Do not expose the battery to extreme hot or cold temperatures, as this can degrade performance and lifespan.

7. Troubleshooting

Problem	Possible Cause	Solution
Battery not charging	Charger not properly connected. Faulty charger or power outlet. Battery contacts are dirty. Battery is too hot or too cold.	Ensure charger is securely plugged into both the vacuum and the wall outlet. Test the charger with another device or try a different outlet. Clean battery contacts with a dry cloth. Allow battery to reach room temperature before charging.
Short operating time	Battery not fully charged. Battery nearing end of lifespan. Vacuum operating in high-power mode.	Ensure battery is fully charged before use. Consider replacing the battery if it's old and performance has significantly degraded. Use standard power mode for longer runtime.
Battery feels hot during use/charging	Normal operation (slight warmth). Overuse or high-power demand. Internal fault.	A slight warmth is normal. Allow the vacuum and battery to cool down. If excessively hot or accompanied by smoke/odor, discontinue use immediately and contact MIUZZY support.
