PEMP PP-9213A

PEMP 10.25" Linux Head Unit Instruction Manual

Model: PP-9213A

For BMW 3 Series F30 F20 NBT CIC (2013-2015 328i, 320i)

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your PEMP 10.25" Linux Head Unit. This unit is designed to enhance your driving experience by integrating modern features like wireless and wired CarPlay and Android Auto, while retaining original vehicle functionalities.

Image 1.1: The PEMP 10.25" Linux Head Unit showcasing Apple CarPlay with navigation and music playback.

2. KEY FEATURES

- **OEM Bluetooth Support:** Seamless integration with your vehicle's original Bluetooth for calls, ensuring high-quality audio and no echo during CarPlay and Android Auto usage.

- **HD Display:** Features a 1920x720 resolution capacitive touch screen for clear visuals and responsive interaction.
- **CarPlay & Android Auto:** Supports both wireless and wired connections for Apple CarPlay and Android Auto, eliminating the need for additional adapters.
- **OEM Information Retention:** Displays factory monitor information and allows switching between the original OEM interface and the new CarPlay/Android Auto interface by long-pressing the Menu button.
- **Steering Wheel Control:** Maintains compatibility with original steering wheel button functions.
- **Quick Boot & Reverse Camera:** Linux system ensures fast boot-up times and quick display of reverse camera video (within 2 seconds).
- **Camera Support:** Compatible with both OEM and aftermarket cameras (720P or less) for clear reversing images.
- **USB Media Playback:** Supports playing music and video files via USB.

3. PACKAGE CONTENTS

4. SETUP AND INSTALLATION

Professional installation is recommended. Ensure the vehicle's power is off before beginning installation.

4.1. Compatibility Check

This unit is compatible with BMW 3 Series F30 F20 models with NBT or CIC systems, typically from 2013 to 2015 (e.g., 328i, 320i). Verify your vehicle's OEM display interface type (4-pin CIC, 6-pin CIC, 6-pin NBT, or 6-pin EVO) to ensure proper LVDS connection.

Why can't get OEM car info and Sound?

Please press the FM/AM button to confirm whether the OEM radio has sound?

A: If the OEM radio has sound, you need to set the resolution, the setting path is: Setup>Car Settings>Original Car's Screen Resolution> Select the item

B: If there is no sound from the OEM radio, you will need to reconnect the socket on the back of the OEM radio, Refer to the picture on the right.

Image 4.1: Guide to checking the LVDS connection socket on the back of the OEM display.

4.2. Wiring Connections

Follow the wiring diagram carefully for correct connections. Pay special attention to the optical fiber cable and AUX input.

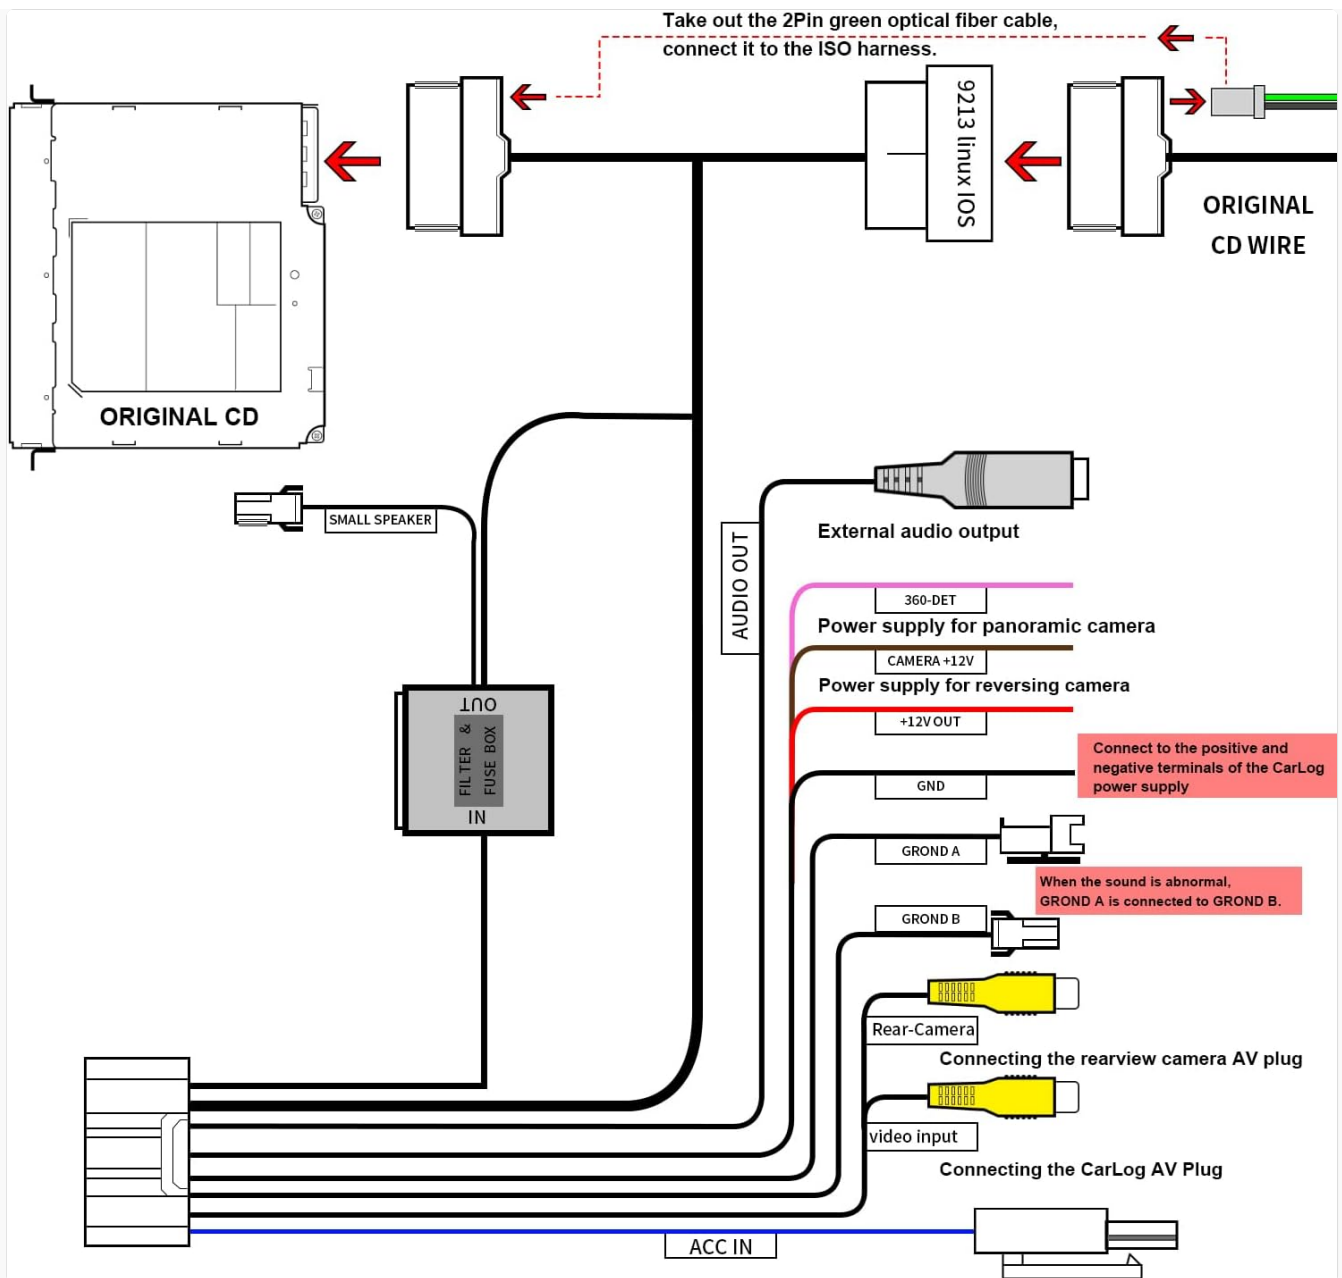

Image 4.2: Comprehensive wiring diagram for the head unit installation.

- **Optical Fiber Cable:** Carefully transfer the 2-pin green optical fiber cable from the original vehicle's ISO plug to the new Linux harness. This is crucial for sound and OEM information.
- **AUX Input:** For models where the AUX directly enters the audio amplifier, you must plug the provided audio cable into the AUX IN connector in the armrest box to enable sound from the Linux system.

NOTE: Please correctly transfer the 2P green optical fiber cable on the ISO plug of the original vehicle

Take out the 2Pin green optical fiber cable, connect it to the Linux harness.

Image 4.3: Steps for transferring the optical fiber cable.

The AUX of some models directly enters the audio amplifier, you must plug the audio cable (with accessories in the package) into the AUX interface in the armrest box to get the Linux sound.

Image 4.4: Connecting the audio cable to the AUX IN port.

4.3. Setting OEM Resolution

After installation, it is essential to set the correct OEM screen resolution for proper display. If the display appears distorted, adjust the resolution in the settings.

Your browser does not support the video tag.

Video 4.1: This video demonstrates how to correctly set the OEM resolution on your new head unit. It shows navigating through the settings menu to find 'Car Settings' and 'Original Car's Screen Resolution' to select the appropriate resolution for your vehicle's original display.

To set the resolution:

1. Go to **Setup**.
2. Select **Car Settings**.
3. Choose **Original Car's Screen Resolution**.
4. Select the resolution that matches your original car's display (e.g., 800x480 or 1280x480).

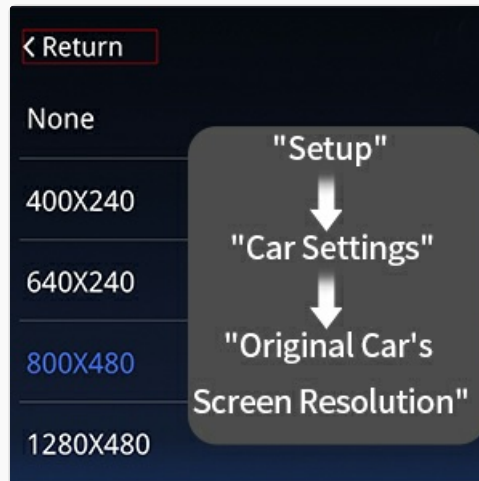

Image 4.5: Menu path for adjusting screen resolution.

5. OPERATING INSTRUCTIONS

5.1. Switching Interfaces

You can easily switch between the new Linux system interface (CarPlay/Android Auto) and your original BMW OEM interface. Long-press the Menu button on your iDrive controller to toggle between the two systems.

You can switch between OEM info and the new system.

Image 5.1: Switching between OEM info and the new system.

5.2. CarPlay and Android Auto

The head unit supports both wireless and wired connections for CarPlay and Android Auto. For wired connections, ensure you use USB IN 1.

Built-in Carplay and Android Auto

Supports wireless/wired apple carplay and Android Auto, No need to purchase additional Carplay/Android Auto Adapter

Image 5.2: Built-in CarPlay and Android Auto support.

Image 5.3: USB input for wired CarPlay/Android Auto.

5.3. Camera Functionality

The unit supports both your vehicle's original camera and aftermarket cameras (CVBS or 720P AHD format). You can select the camera type in the settings.

Support for OEM and aftermarket front and rear view cameras

You can select the camera option in the settings the after-market camera only support CVBS or 720P AHD format

Image 5.4: Support for OEM and aftermarket front and rear view cameras.

To select camera type:

1. Go to **Setup**.
2. Select **Car Settings**.
3. Choose **Reversing Settings**.
4. Select **Camera Type** and choose between 'Original Camera' or 'Aftermarket Camera'.

Image 5.5: Menu path for camera settings.

6. MAINTENANCE

To ensure the longevity and optimal performance of your PEMP Head Unit, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and unit. Avoid abrasive cleaners or solvents that could damage the surface.
- **Temperature:** Do not expose the unit to extreme temperatures or direct sunlight for prolonged periods.
- **Software Updates:** Periodically check for firmware updates from PEMP to ensure you have the latest features and bug fixes.

7. TROUBLESHOOTING

If you encounter issues with your head unit, refer to the following common problems and solutions:

7.1. No OEM Car Info or Sound

If you are not getting OEM car information or sound, check the following:

- **OEM Radio Sound:** Press the FM/AM button on your original car radio to confirm if it has sound.
- **Resolution Setting:** If the OEM radio has sound, ensure the correct resolution is set in the unit's settings (refer to Section 4.3).
- **Fiber Optic Cable:** If there is no sound from the OEM radio, you may need to reconnect the 2-pin green optical fiber cable on the back of the OEM radio to the new harness (refer to Section 4.2).
- **AUX Connection:** Ensure the audio cable is correctly plugged into the armrest box AUX IN connector (refer to Section 4.2).

Image 7.1: Common issues causing loss of OEM car info and sound.

7.2. Distorted or Incorrect Display

If the display is distorted or not showing correctly, verify that the OEM screen resolution is set properly in the unit's settings (refer to Section 4.3).

7.3. General Issues

For any other issues, please contact PEMP customer support. They respond to messages within 24 hours and have a professional after-sales team to assist you.

8. SPECIFICATIONS

Feature	Specification
Brand	PEMP
