3. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward. It is recommended to assemble the bed frame with two people. All necessary pieces and instructions are packed in one box.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface (like a carpet) to prevent scratches.
2. **Identify Parts:** Refer to the parts list in the hardware pack or the included diagram to identify each component.
3. **Attach Side Rails to Headboard:** Connect the side rails to the headboard using the provided bolts and an Allen wrench. Do not fully tighten bolts until all major components are connected.
4. **Attach Footboard:** Connect the other end of the side rails to the footboard. Ensure the vintage circular design elements are positioned as desired.
5. **Install Center Support Legs:** Attach any central support legs to the main frame as indicated in the diagram.
6. **Place Slats:** Lay the metal slats across the side rails. The embedded slat design allows for easy placement. Ensure

the noise-free foam strips on the slats are positioned correctly to reduce friction and prevent noise.

7. **Secure Slats:** Secure the slats to the side rails using the designated fasteners.
8. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts and screws.
9. **Inspect:** Double-check all connections to ensure they are secure and the frame is stable.
