› Wireless Cat Water Fountain Stainless Steel, 152oz/4.5L Cat Fountain Battery Operated, Cordless Pet Water Fountain for Cats & Dogs with Motion Sensor, Ultra Quiet Pump, 6 Filters Cat Fountain + 6 Filters + 6 Sponges

## smartoo PSWFS006S

# smartoo Wireless Cat Water Fountain User Manual

This manual provides comprehensive instructions for the setup, operation, and maintenance of your smartoo Wireless Cat Water Fountain, Model PSWFS006S. Please read thoroughly before first use.

## PRODUCT OVERVIEW

The smartoo Wireless Cat Water Fountain is designed to provide fresh, clean water for your pets with ultimate convenience. Its cordless design allows flexible placement, while advanced features ensure hygiene and quiet operation.

## SETUP GUIDE

Setting up your smartoo Wireless Cat Water Fountain is straightforward. Follow these steps to ensure proper assembly and initial operation.

### Unboxing and Component Identification

Carefully remove all components from the packaging. Verify that all parts listed in the "Packing Accessories" image below are present.

# Packing Accessories

Image: All individual components of the fountain, including the stainless steel tank, water tray, master control module, pump, cables, and filters.

## Assembly Instructions

- Clean Components:** Before first use, wash all parts that will come into contact with water (stainless steel tank, water tray, filter tray) with mild soap and water. Rinse thoroughly.
- Install Filter:** Place the multi-layer filter into the filter tray. It is recommended to immerse the filter in clean water for 5 minutes before first use to prevent blocking.
- Assemble Pump and Module:** Connect the pump set to the master control module. Ensure the pump power cord and pump holder are connected to the correct interface as shown in the user manual.
- Place Module:** Insert the assembled pump and master control module into the designated slot in the stainless steel water tank.
- Fill with Water:** Fill the stainless steel tank with clean water up to the MAX line, visible through the transparent window. The large 4.5L capacity ensures your pet stays hydrated for an extended period.
- Place Water Tray:** Position the stainless steel water tray on top of the tank, ensuring it sits securely.

7. **Charge Battery:** Ensure the built-in 4000mAh rechargeable battery is fully charged before initial use. A full charge can provide up to 60 days of operation.

## OPERATING INSTRUCTIONS

The smartoo Wireless Cat Water Fountain offers multiple operating modes to suit your pet's needs and conserve battery life.

### Water Modes

The fountain features three distinct working modes:

- **Sensing Mode:** When a pet approaches within 31.5 inches (80cm) of the fountain, it will automatically dispense water for 15 seconds. This is the most recommended mode for optimal freshness and battery efficiency.
- **Intermittent Mode:** Water is dispensed for 15 seconds at intervals of 10 minutes. This mode provides regular hydration without constant flow.
- **Constant Mode:** Water flows continuously. This mode is suitable for pets who prefer a constant water source.

## 3 Water Modes

Switch between sensing mode, intermittent mode or constant mode

Image: Visual representation of the three water modes and their activation methods.

## Smart Indicators

The master control module includes smart indicators to keep you informed about the fountain's status:

- **Low Battery Reminder:** An indicator light will alert you when the battery needs recharging.
- **Filter Replacement Reminder:** A light will indicate when it's time to replace the filter for continued water purity.
- **Low Water Level Detection:** The fountain will detect insufficient water levels, preventing the pump from running dry.

# MAINTENANCE AND CLEANING

Regular maintenance is crucial to ensure the longevity and hygienic operation of your smartoo Wireless Cat Water Fountain.

## Cleaning the Fountain

The fountain's SUS 304 stainless steel construction makes it easy to clean and dishwasher-safe, promoting a cleaner water source and preventing bacterial growth.

- **Disassembly:** Disassemble the fountain by removing the water tray, filter tray, and master control module with the pump.
- **Washing:** Wash the stainless steel tank and water tray with mild soap and water. These parts are dishwasher-safe.
- **Pump Cleaning:** Clean the pump regularly to prevent mineral buildup and ensure optimal water flow. Use the provided cleaning brush for thorough cleaning.
- **Reassembly:** Reassemble all components once they are clean and dry.

### 3 Water Modes Available for Your Cats

## Filter Replacement

The vertical filtration system ensures every drop of water is purified. This system includes activated carbon, ion exchange resin, medical stone, and non-woven fabric to remove impurities, soften water, and eliminate odors.

# Purity in Every Drop

4-layer filtration system removes heavy metals, dirt, and other harmful substances

Image: An exploded view illustrating the layers of the filtration system.

Replace the filter regularly as indicated by the filter replacement reminder light or approximately every 2-4 weeks, depending on usage and water quality, to maintain optimal filtration performance.

## TROUBLESHOOTING

If your smartoo Wireless Cat Water Fountain is not functioning as expected, please refer to the following common issues and solutions:

- **Fountain Does Not Turn On:**

- Ensure the power button on the master control module is pressed to turn the unit on.

- Verify that the built-in battery is fully charged. Connect the fountain to the power adapter using the Type-C cable to charge.

• **Water Not Flowing:**

- Check if there is sufficient water in the tank. Refill if the water level is below the MIN mark.
- Ensure the pump power cord and pump holder are correctly connected to the interface on the master control module.
- Clean the pump and filter. A clogged filter or pump can restrict water flow.

• **Fountain is Noisy:**

- Ensure the water level is above the MIN mark. Low water levels can cause the pump to make noise.
- Check for any debris or hair in the pump impeller. Clean the pump thoroughly.
- Ensure all components are assembled correctly and securely.
