SETUP AND INSTALLATION

Follow these steps for a smooth and hassle-free installation of your YASINU bathtub faucet. Ensure you measure your existing installation pipes before beginning.

Installation Steps:

1. **Prepare Connections:** Ensure the connection fits your existing plumbing (1/2 inch or 3/4 inch thread, 1/2 inch pipe). Use the provided adapters if necessary.
2. **Attach Handheld Shower Hose:** Connect the handheld shower hose to the tub spout diverter. Ensure washers are properly seated on both ends of the hose.
3. **Secure Shower Holder:** Attach the adhesive shower holder to a clean, dry wall surface. For optimal adhesion, allow 24 hours before placing the handheld shower in the holder.

Is this product suitable for me?

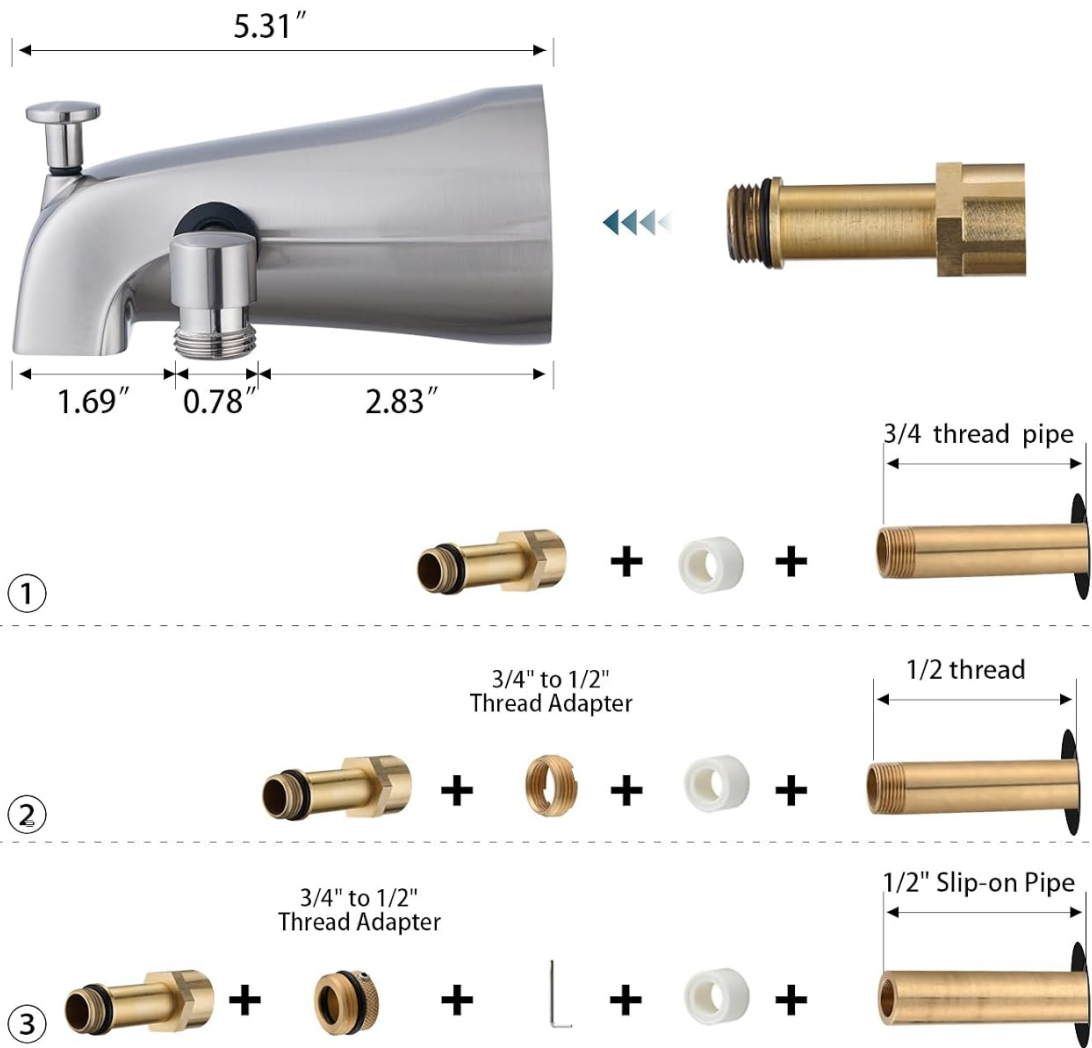

Image: Diagram illustrating the universal fit options for connecting the faucet to different pipe sizes.

Hassle-Free Installation

Make sure the washers are on both ends of the hose. Hex nut connect tub spout diverter and conical nut connect the handheld shower. (Adhesive Shower Holder is better to waiting 24hours)

Installation Video Guide:

Video: Demonstrates how to easily attach the handheld shower head to your bathtub spout and operate the diverter.

OPERATING INSTRUCTIONS

Your YASINU faucet is designed for ease of use, offering multiple spray settings and a convenient diverter function.

Using the Diverter:

- To activate the handheld showerhead, simply **lift up** the diverter knob on the tub spout.
- To use the tub spout for filling the bath, **push down** the diverter knob.

Convenient to Use

Image: Visual guide on how to operate the diverter knob to switch between tub spout and handheld shower.

Adjusting Spray Settings:

The handheld showerhead features 10 distinct spray modes to customize your bathing experience. Rotate the showerhead face or use the selector on the side (if applicable) to cycle through the settings.

- **Saturating:** A full, steady stream for thorough rinsing.
- **Massage Dot Massage:** Concentrated streams for a targeted massage.
- **Strong Spray:** A powerful, invigorating spray.
- **Misty:** A fine, gentle mist.
- **Suaturating:** (Likely a typo for Saturating or a similar full spray)
- **Water Saving:** Reduced flow for conservation.
- Includes a high-pressure power wash mode for quick soap scum and hair removal.

MAINTENANCE

Proper maintenance will ensure the longevity and optimal performance of your YASINU bathtub faucet.

Cleaning:

- Clean the faucet and showerhead regularly with a soft cloth and mild soap or a non-abrasive bathroom cleaner.
- Avoid using abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the brushed nickel finish.
- For hard water spots, use a solution of equal parts white vinegar and water, apply with a soft cloth, and rinse thoroughly.

Preventive Measures:

- Periodically check all connections for any signs of leaks and tighten if necessary.

- Ensure the shower hose is not kinked or twisted during use or storage to prevent damage.

TROUBLESHOOTING

If you encounter any issues with your YASINU bathtub faucet, refer to the common troubleshooting tips below.

Problem	Possible Cause	Solution
Low Water Pressure	Clogged aerator or showerhead nozzles.	Remove and clean the aerator/nozzles. Check water supply valves are fully open.
Leaking from Connections	Loose connections or worn washers.	Tighten connections. Replace washers if they appear worn or damaged.
Diverter Not Switching Properly	Debris in diverter mechanism or worn internal components.	Flush the system by running water through both the spout and showerhead. If issue persists, contact customer support.

If the problem persists after attempting these solutions, please contact YASINU customer support for further assistance.
