HMHAMA V12

HMHAMA Side Brush Kit for Midea V12 Robot Vacuum Cleaner - Instruction Manual

Model: Midea V12 / V10 Compatible Accessories

1. Introduction

This instruction manual provides essential information for the proper installation, maintenance, and replacement of your HMHAMA Side Brush Kit, designed for Midea V12 and V10 Robot Vacuum Cleaners. Adhering to these guidelines will help ensure optimal performance and longevity of your robot vacuum's cleaning capabilities.

The side brushes are crucial components that sweep debris from edges and corners into the main cleaning path of the vacuum cleaner.

2. Product Components

Your HMHAMA Side Brush Kit includes the following items:

- 10 x Side Brushes (compatible with Midea V12 / V10 Robot Vacuum Cleaners)

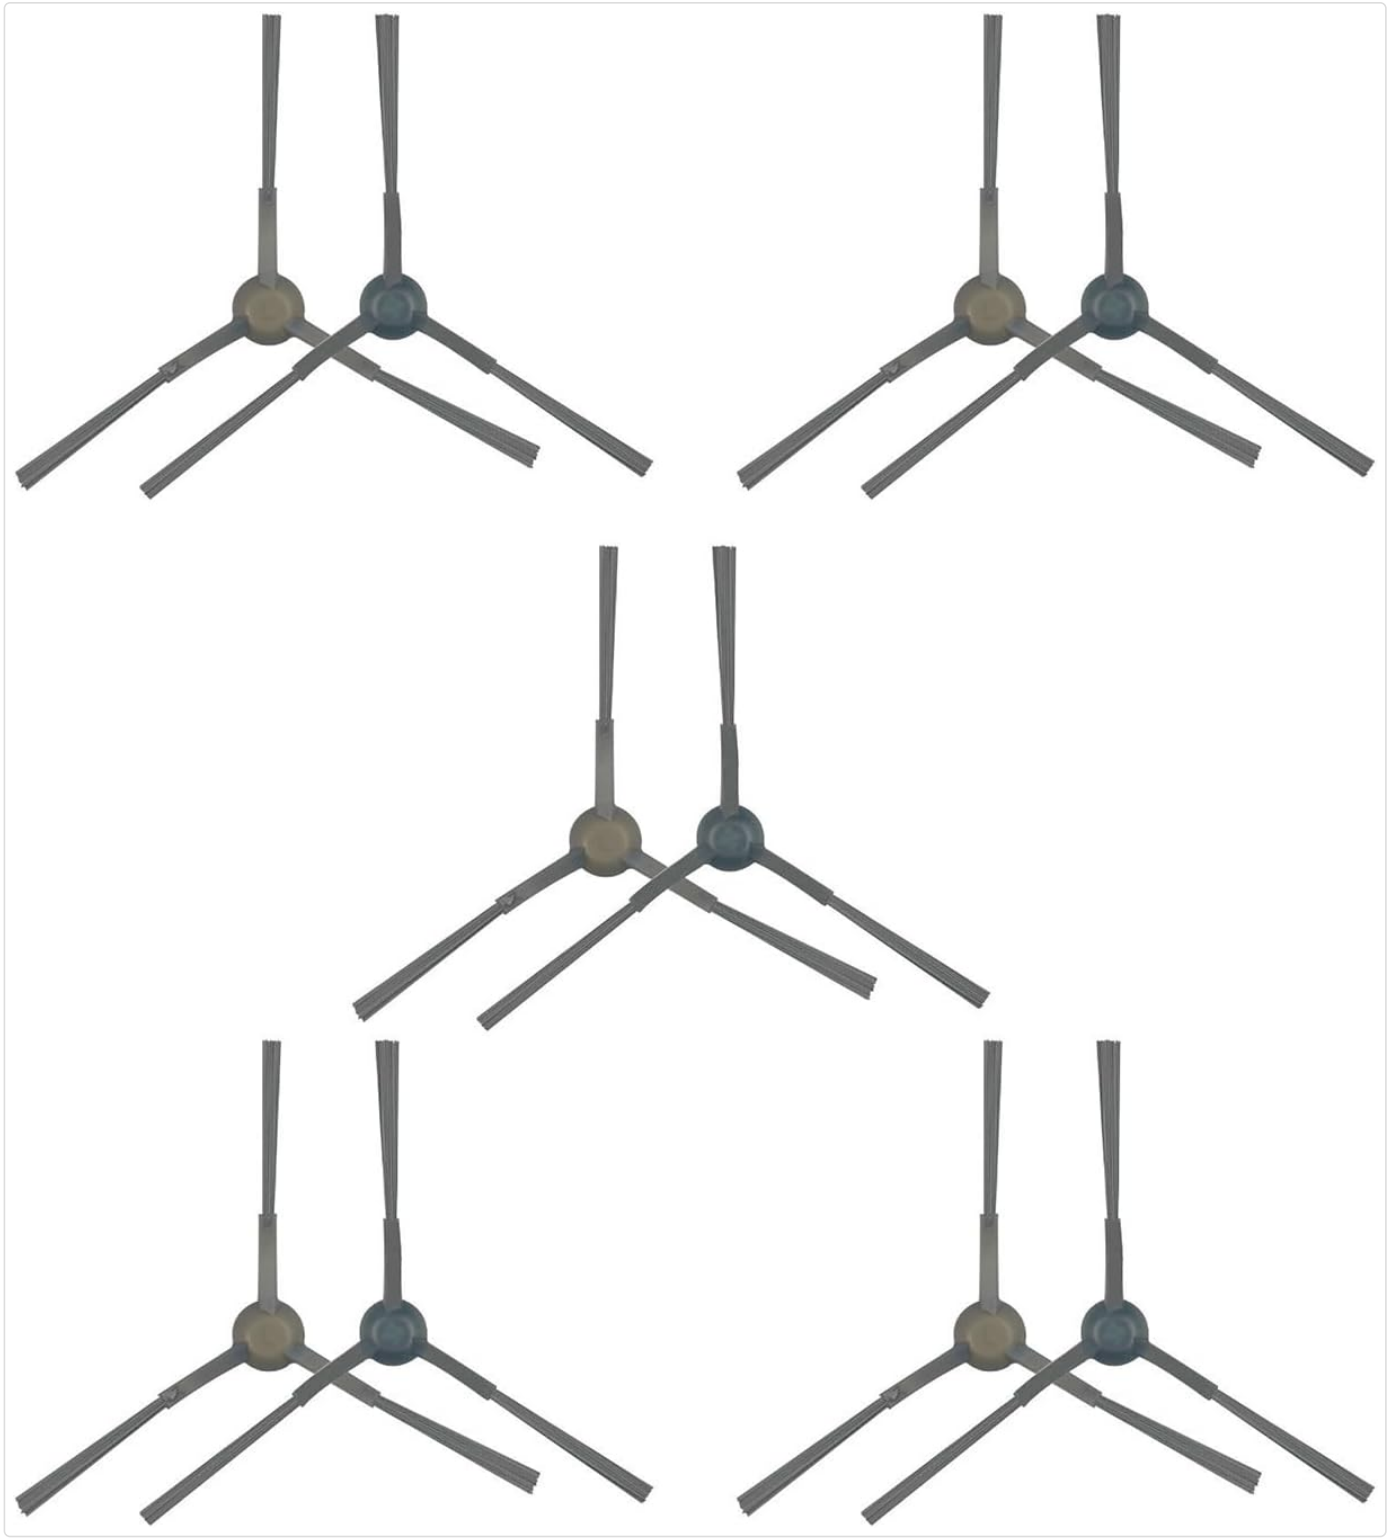

Image 1: Overview of the HMHAMA Side Brush Kit, showing ten individual side brushes.

3. Installation (Setup)

Follow these steps to replace the side brushes on your Midea V12 or V10 Robot Vacuum Cleaner:

1. **Power Off:** Before beginning, ensure your robot vacuum cleaner is powered off and disconnected from its charging base.
2. **Access Brushes:** Carefully turn the robot vacuum cleaner upside down to access the underside where the side brushes are located.
3. **Remove Old Brushes:** Depending on your specific Midea V12/V10 model, the side brushes are typically held in place by a single screw or a snap-on mechanism. Use a screwdriver (if necessary) to remove the screw, then gently pull the old brush upwards to detach it.

4. **Install New Brushes:** Align the new HMHAMA side brush with the corresponding post on the vacuum cleaner. Ensure the brush's base matches the shape of the post. Some models may have color-coded bases (e.g., blue for left, yellow for right) or specific L/R markings. Press the new brush firmly into place or secure it with the screw you removed earlier.

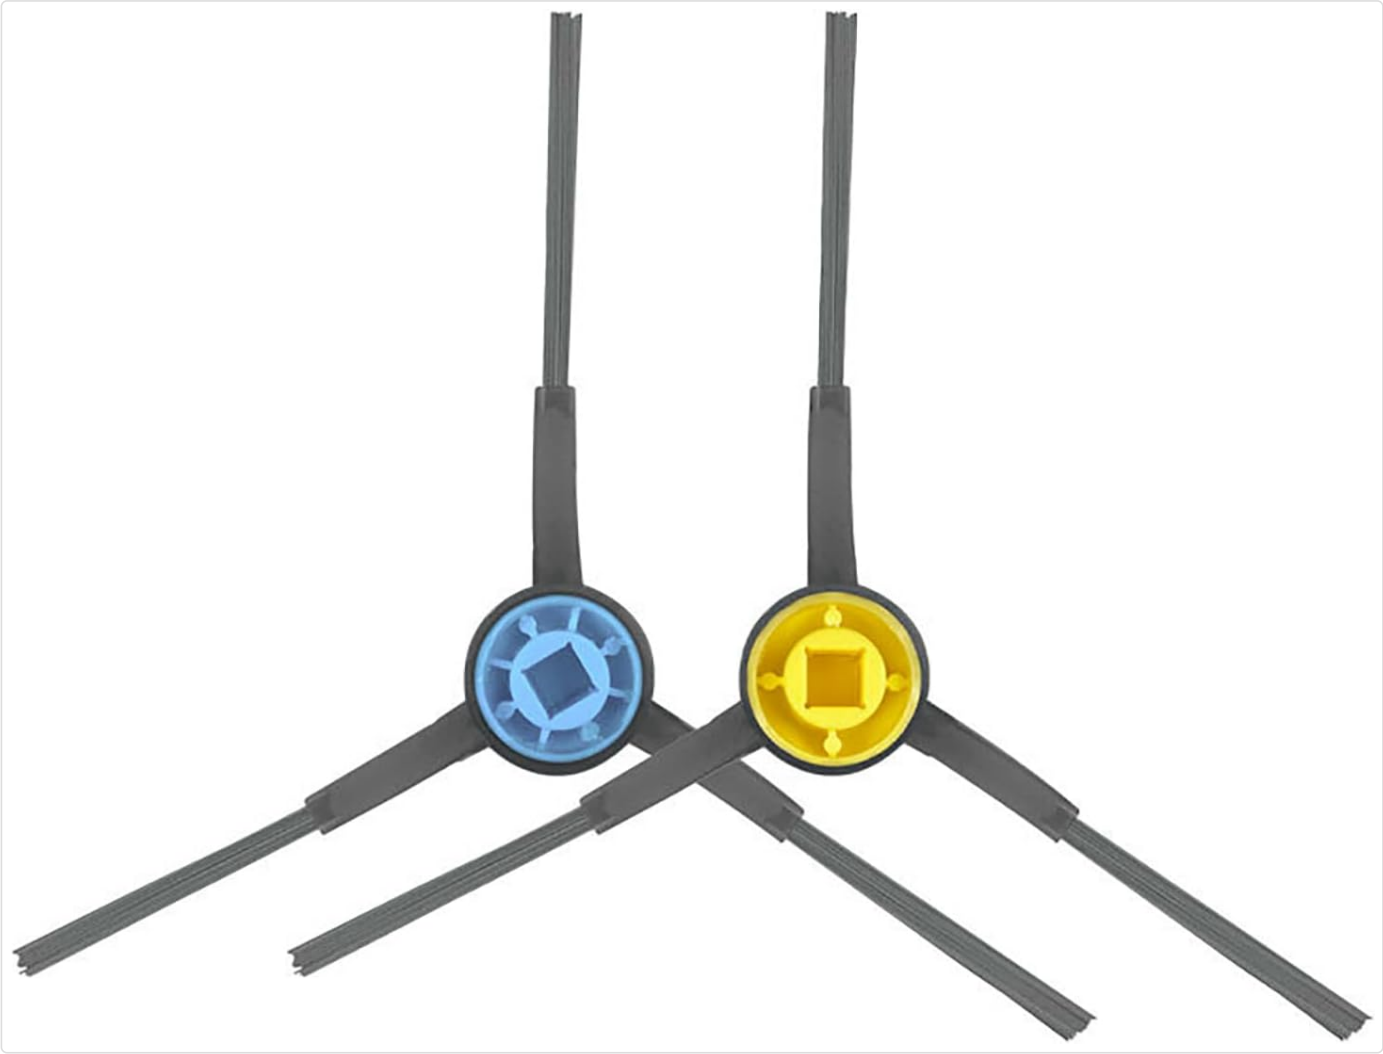

Image 2: Example of side brushes with distinct colored bases, which may indicate specific left/right installation points on the vacuum.

5. **Verify Installation:** Gently spin the newly installed brushes by hand to ensure they are securely attached and can rotate freely without obstruction.
6. **Power On:** Turn the robot vacuum cleaner back over and power it on.

4. Maintenance

Regular maintenance of your side brushes is essential for maintaining the cleaning efficiency of your robot vacuum.

- **Inspection:** Periodically inspect the side brushes for tangled hair, debris, or signs of wear and tear.
- **Cleaning:** If hair or debris is tangled around the brush bristles or base, carefully remove it using scissors or a cleaning tool.
- **Replacement Schedule:** For optimal performance, it is recommended to replace the side brushes every **2-3 months**, depending on usage frequency and cleaning environment.

5. Troubleshooting

If you encounter issues after replacing your side brushes, consider the following:

- **Brushes Not Spinning:**
  - Ensure the brushes are securely installed and the screw (if applicable) is tightened.
  - Check for any obstructions or debris caught in the brush motor area.
- **Reduced Cleaning Performance:**
  - Verify that the brushes are not bent or excessively worn. Replace if necessary.
  - Ensure other vacuum components (main brush, filter, dustbin) are also clean and properly maintained.

6. Specifications

Product Type	Robot Vacuum Cleaner Side Brushes
Brand	HMHAMA
Compatibility	Midea V12 Robot Vacuum Cleaner, Midea V10 Robot Vacuum Cleaner
