USAGE GUIDELINES

- **Mattress Compatibility:** This platform bed frame does not require a box spring. It is designed to support your mattress directly on its 12 thick wood slats.
- **Recommended Mattress Thickness:** For optimal comfort and aesthetic, a mattress thickness of 8-12 inches is recommended.
- **Noise-Free Design:** The bed frame incorporates EVA foams and installment Velcro to minimize noise, ensuring a quiet and undisturbed sleep experience.
- **Under-Bed Storage:** A 12.2-inch clearance beneath the bed provides ample space for storing various items or for easy vacuuming.

CARE AND MAINTENANCE

- **Cleaning:** Wipe the bed frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can

damage the woodgrain finish.

- **Inspection:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain structural integrity.
- **Avoid Excessive Weight:** Do not exceed the maximum weight capacity of 1,000 lbs. Avoid placing heavy, concentrated loads on specific areas of the frame.
- **Environmental Conditions:** Keep the bed frame away from direct sunlight and extreme temperature changes to prevent warping or fading of the wood finish.

TROUBLESHOOTING

Common Issues and Solutions

- **Issue:** The bed frame makes creaking noises.
Solution: Ensure all assembly bolts and screws are fully tightened. The integrated EVA foams are designed to prevent noise, but loose connections can still cause sounds.
- **Issue:** Wood components appear misaligned or do not fit perfectly.
Solution: Double-check the assembly steps against the provided manual. Sometimes, components may appear misaligned if not fully seated or if screws are not tightened evenly. Disassemble the affected section and reassemble carefully.
- **Issue:** Screws cause wood to crack during assembly.
Solution: This can occur if screws are over-tightened or if pilot holes are not properly aligned. Always tighten screws until snug, but avoid excessive force. If a crack occurs, contact customer support for replacement parts.
- **Issue:** Mattress slides on the frame.
Solution: The bed frame features thick side rails to help keep the mattress in place. Ensure the mattress is correctly centered on the slats. If sliding persists, consider using a non-slip mattress pad.
