Tideme Water Bladder Tank

Tideme Portable 500L Collapsible Water Tank Instruction Manual

Model: Water Bladder Tank

Introduction

Thank you for choosing the Tideme Portable 500L Collapsible Water Tank. This manual provides essential information for the safe and effective use of your new water storage solution. Designed for versatility, this tank is ideal for various applications including rainwater collection, construction sites, camping, RV life, and agricultural irrigation, providing a reliable and vast water reserve. The tank is constructed from durable PVC material, offering resistance to abrasion, tears, and strong sunlight, ensuring long-term durability and robust leak-proof performance. Its collapsible design ensures easy transport and storage.

Safety Information

- Do not use this tank for storing potable (drinking) water unless explicitly stated by the manufacturer or if proper purification

methods are applied. This tank is primarily for non-potable water storage.

- Ensure the tank is placed on a flat, level, and stable surface to prevent tipping or rupture when full.
- Keep the tank away from sharp objects or abrasive surfaces that could puncture the material.
- Avoid exposing the tank to extreme temperatures beyond its specified operating range.
- Do not overfill the tank.
- Supervise children and pets around the water tank.
- Always secure the lid tightly to prevent contamination and spillage.

Package Contents

Verify that all components are present and undamaged upon unpacking:

- 1 x Tideme Portable Water Tank (500L capacity)
- 1 x Secure Lid
- 1 x Water Outlet Connector (Valve)

Image: Product dimensions and included components: water tank, lid, and valve connector.

Setup

1. **Unpack:** Carefully remove the water tank and all accessories from the packaging.
2. **Inspect:** Check the tank for any signs of damage, punctures, or manufacturing defects. Do not use if damaged.
3. **Choose Location:** Select a flat, level, and stable surface for placement. Ensure the area is free from sharp objects, debris, or anything that could compromise the tank's integrity.
4. **Unfold:** Gently unfold the collapsible water tank.
5. **Attach Valve:** Screw the water outlet connector (valve) securely onto the designated outlet port at the bottom of the tank. Ensure a tight seal to prevent leaks.

6. **Attach Lid:** Ensure the lid is ready to be securely fastened once the tank is filled.

Operating Instructions

1. **Filling the Tank:**
    - Open the top lid of the tank.
    - Position a hose or collection system to direct water into the tank.
    - Fill the tank slowly, observing its expansion. Do not overfill.
    - Once desired water level is reached, securely close the lid.
2. **Dispensing Water:**
    - Ensure the valve connector is properly attached.
    - Turn the handle on the valve to the open position to allow water to flow out.
    - Turn the handle to the closed position to stop the water flow.
3. **Emptying the Tank:**
    - Open the valve completely.
    - Allow all water to drain. For complete drainage, you may need to gently lift or tilt the tank (if partially full and manageable) towards the valve.

Maintenance

- **Cleaning:** Periodically clean the inside of the tank, especially if storing water for extended periods or if sediment accumulates. Use mild soap and water, rinse thoroughly, and allow to air dry completely before storage.
- **Inspection:** Regularly inspect the tank for any signs of wear, tears, or leaks. Check the valve and lid for proper function and seal.

- **Storage:** When not in use, empty the tank completely, clean it, and allow it to dry. Fold it neatly and store it in a cool, dry place away from direct sunlight and sharp objects.

Troubleshooting

Problem	Possible Cause	Solution
Water Leakage	Valve not tightened, puncture in tank, lid not sealed.	Ensure valve and lid are securely tightened. Inspect tank for damage; if punctured, repair or replace.
Slow Water Flow	Valve partially closed, debris in valve, tank not elevated.	Fully open valve. Check valve for obstructions. Elevate tank for better gravity flow.
Tank Does Not Expand Fully	Insufficient water pressure, air trapped inside.	Ensure adequate water pressure during filling. Gently manipulate tank to release trapped air.

Specifications

- **Brand:** Tideme
- **Model Number:** Water Bladder Tank
- **Capacity:** 500 Liters (approximately 132 Gallons)
- **Material:** Polyvinyl Chloride (PVC)
- **Color:** Blue
- **Item Weight:** 4.93 Kilograms (approximately 10.85 pounds)
- **Package Dimensions:** 24.25 x 20.94 x 4.53 inches
- **UPC:** 768346278780
