GoPro AGRTM-002

GoPro Flexible Grip Mount User Manual

Model: AGRTM-002

Introduction

The GoPro Flexible Grip Mount is a versatile accessory designed to provide flexible mounting options for your GoPro camera. It utilizes Nite Ize Gear Tie® Rubber Twist Ties™ to securely attach your camera to various objects, enabling unique and challenging perspectives. Its rotating base allows for 360° camera adjustment without repositioning the mount.

What's Included

Verify that all components are present in the packaging:

- Flexible Grip Mount
- 2 Pairs of 16-inch Nite Ize Gear Tie® Rubber Twist Ties™
- Vertical Mounting Buckle
- Thumb Screw

Setup and Installation

Follow these steps to set up and install your Flexible Grip Mount:

1. **Attach GoPro to Mount:** Secure your GoPro camera to the Flexible Grip Mount using the provided Vertical Mounting Buckle and Thumb Screw. Ensure the camera is firmly attached.
2. **Identify Mounting Point:** Choose a stable object or surface to which you wish to attach the mount. This can include railings, fences, branches, bike frames, paddles, or other irregularly shaped objects.
3. **Wrap Gear Ties:** Use the Nite Ize Gear Tie® Rubber Twist Ties™ to wrap around the chosen object and the Flexible Grip Mount. Twist the ties firmly to create a secure attachment. The flexible nature of the ties allows for various wrapping configurations.

Operating the Flexible Grip Mount

Once installed, the Flexible Grip Mount offers dynamic positioning capabilities:

- **Camera Angle Adjustment:** The base of the mount rotates a full 360°. This allows you to adjust your camera's capture angle without needing to unmount and remount the entire setup. The base features stopping points at every 90° for precise positioning.
- **Repositioning:** The Nite Ize Gear Ties are designed for quick adjustment and repositioning. While sturdy for stability, they are flexible enough to be unwrapped and re-wrapped as needed to change the mount's location or orientation.
- **Use as a Stand:** The flexible nature of the Gear Ties also allows the mount to function as a 4-legged camera stand on flat or uneven surfaces.

Image: A GoPro camera mounted upside down on a vehicle's roll bar, showcasing the mount's adaptability for various angles and environments.

Maintenance

To ensure the longevity and optimal performance of your Flexible Grip Mount:

- **Cleaning:** Wipe the mount and ties with a damp cloth to remove dirt or debris. Avoid harsh chemicals.
- **Tie Replacement:** The Nite Ize Gear Tie® Rubber Twist Ties™ are replaceable. If they become worn or damaged, new ties can be easily installed without the need for tools. The product includes a spare pair for convenience.
- **Storage:** Store the mount in a cool, dry place when not in use.

Troubleshooting

If you encounter issues with your Flexible Grip Mount, consider the following:

- **Mount Instability:** Ensure the Gear Ties are twisted tightly around both the mount and the object. The ties should be taut and secure.

- **Camera Not Holding Position:** Verify that the thumb screw securing the GoPro to the vertical mounting buckle is tightened sufficiently.
- **Difficulty Rotating Base:** Check for any obstructions or debris around the rotating mechanism. Ensure the mount is not overtightened to the object, which might impede rotation.

Specifications

Product Dimensions	7 x 4 x 1.8 inches
Item Weight	6.4 ounces
Model Number	AGRTM-002
Brand	GoPro
Color	Black
Compatible Devices	Cameras (GoPro)
Mounting Type	Tabletop Mount, Flexible Grip Mount
