2. KEY FEATURES

- **Ergonomic Design:** Features a 45° tilt at the top and an upgraded air cushion edge to support the neck and relieve pain, promoting better sleep posture.
- **Adjustable Height:** Increased height on the bottom air cushion accommodates taller individuals.
- **Portable:** Deflates and packs into a compact storage bag for easy transport.
- **Quick Inflation/Deflation:** Designed for rapid inflation (5-10 breaths) and deflation (approximately 5 seconds).
- **Versatile Use:** Suitable for airplanes, cars, trains, and office napping.

More Comfortable Journey

Effectively prevent cervical spine pain

Ergonomically Designed Neck Pillow

Correct posture can avoid pain and numbness

Not Enough Support

Bad posture causes neck, shoulders, and waist pain

Image: Illustration demonstrating how the ergonomic design supports the neck at a 45-degree angle to prevent pain, contrasting with poor posture without support.

3. SETUP: INFLATION INSTRUCTIONS

1. Locate the air valve on the pillow.
2. Open the valve cap.
3. Inflate the pillow by blowing air into the valve. Approximately 5 to 10 deep breaths are typically sufficient.
4. Inflate to about 90% capacity for optimal comfort and support.

5. Close the valve cap securely to prevent air leakage.

Image: Visual guide on opening the valve, inflating the pillow, and closing the valve for use.

Large Air Valve Inflate and Deflate Faster

Inflation Time:
5~10 deep breaths

Deflation Time:
5 seconds

Image: Detail of the large air valve, indicating quick inflation and deflation times.

4. USAGE AND OPERATION

The Maliton Inflatable Travel Pillow offers multiple ways to achieve comfortable rest, adapting to various environments and preferences.

4.1. Resting Positions

- **Forward Lean:** Place the pillow on a tray table or your lap. Rest your head in the central opening, allowing your arms to embrace the pillow for support. This position is ideal for sleeping upright.

- **Side Rest:** Position the pillow to the side, resting your head against it. The design allows for comfortable side sleeping or leaning.
- **Back Support:** Use the pillow as lumbar support when seated, or as a cushion for your back.

4.2. Versatile Applications

- **Airplanes:** Provides head and neck support for sleeping during flights.
- **Cars:** Enhances comfort during long road trips.
- **Trains:** Offers neck support to reduce discomfort on train journeys.
- **Office:** Suitable for short naps or resting during breaks.
- **Home:** Can be used for relaxation or as an additional cushion.

Suitable for Many Occasions

5. DEFLATION AND STORAGE

5.1. Deflation

1. Open the air valve cap.
2. Pull out the small baffle inside the air valve to release air quickly.
3. Gently squeeze the pillow to expel the remaining air. Deflation typically takes about 5 seconds.

5.2. Packing for Portability

1. Once deflated, fold or roll the pillow tightly to minimize its size.
2. Place the folded pillow into the provided storage bag.
3. Secure the drawstring on the storage bag.

The deflated pillow measures approximately 4.3 x 4.3 x 6.7 inches and weighs 0.98 lbs, making it highly portable.

Image: Step-by-step guide on deflating the pillow by opening the valve and squeezing, then folding and placing it into the storage bag.

Easy to Pack and Portable

Image: Illustrates the compact size of the pillow when packed, showing it easily fitting into a small storage bag for travel.

6. CARE AND MAINTENANCE

- **Cleaning:** Wipe the pillow with a damp cloth as needed.
- **Drying:** Allow the pillow to air dry completely before storing to prevent mold or mildew.
- **Storage:** Store in a cool, dry place away from direct sunlight and sharp objects.
- **Avoid Punctures:** Keep the pillow away from sharp objects to prevent damage to the inflatable material.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Pillow does not stay inflated.	Air valve not securely closed, or a puncture.	Ensure the valve cap is fully sealed. Inspect the pillow for any small holes or tears. If a puncture is found, a repair kit may be needed (not included).
Difficulty inflating.	Valve obstruction or insufficient breaths.	Check the valve for any debris. Ensure you are taking deep breaths and blowing directly into the valve.
Pillow feels uncomfortable.	Over-inflation or under-inflation.	Adjust the air level to your preference. The pillow should be firm enough for support but not overly rigid. Try different resting positions.

8. PRODUCT SPECIFICATIONS

- **Brand:** Maliton
- **Model Number:** ITPBK
- **Material:** Flocking and PVC
- **Color:** Blue (for this specific variant)
- **Inflated Dimensions (L x W):** Approximately 20" x 13" (50.8 cm x 33 cm)
- **Packed Dimensions:** Approximately 4.3" x 4.3" x 6.7" (10.9 cm x 10.9 cm x 17 cm)
- **Weight:** Approximately 0.98 lbs (0.44 kg)
- **Recommended Uses:** Traveling, Office Napping
- **Target Body Part:** Neck, Shoulders
