CüboAi Smart Baby Monitor 3

CuboAi Smart Baby Monitor 3 User Manual

Model: Smart Baby Monitor 3

Your partner in baby safety and peace of mind.

Introduction

The CuboAi Smart Baby Monitor 3 is an advanced monitoring system designed to provide parents with comprehensive insights into their baby's well-being. Featuring AI-powered safety alerts, high-resolution night vision, two-way audio, and sleep analytics, this monitor helps ensure your baby's safety and promotes healthy sleep patterns. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to help you maximize the benefits of your CuboAi monitor.

What's Included

Your CuboAi Smart Baby Monitor 3 package includes the following components:

- CuboAi Monitor 3 (Camera Unit)

- Wall Mount Set
- Mobile Stand
- Power Adapter and Cable

Setup Guide

Follow these steps to set up your CuboAi Smart Baby Monitor 3:

1. **Download the CuboAi App:** Search for "CuboAi" in your device's app store (iOS or Android) and download the official application.
2. **Create an Account:** Open the app and follow the on-screen instructions to create a new CuboAi account or log in if you already have one.
3. **Assemble the Stand:** Choose your preferred setup:
    - **Wall Mount:** Attach the wall mount to a sturdy wall above the crib, ensuring it provides a clear, unobstructed view of the entire crib area. Use the provided screws and anchors. Route the power cable through the cable management channels.
    - **Mobile Stand:** Assemble the mobile stand according to the instructions. Place it on a flat, stable surface near the crib, ensuring the camera has a clear view.
4. **Attach the Camera:** Securely attach the CuboAi camera unit to the chosen stand (wall mount or mobile stand).
5. **Connect to Power:** Plug the power adapter into the camera unit and then into a power outlet. The camera will power on.
6. **Pair with App:** Follow the in-app instructions to pair your CuboAi monitor with your smartphone. This typically involves scanning a QR code or connecting to a temporary Wi-Fi network created by the monitor.
7. **Connect to Wi-Fi:** During the pairing process, you will be prompted to connect the monitor to your home Wi-Fi network (WPA/WPA2 recommended). Ensure a stable connection for optimal performance.
8. **Position and Calibrate:** Adjust the camera's position to ensure the entire crib is visible. The app will guide you through calibrating features like covered face and rollover detection zones.

Operating Instructions

The CuboAi Smart Baby Monitor 3 offers a range of features accessible through the CuboAi app:

- **Live View & 2.5K QHD Night Vision:** Access a crystal-clear live video stream of your baby. The 2.5K QHD resolution ensures sharp images, even in low light conditions with advanced night vision.

Image: A side-by-side comparison demonstrating the superior clarity of CuboAi's 2.5K QHD vision compared to other monitors, focusing on a baby's legs.

- **Sleep Safety Alerts:** Receive real-time alerts for Covered Face and Rollover Detection. The AI-powered system is designed to notify you promptly of potential safety concerns.

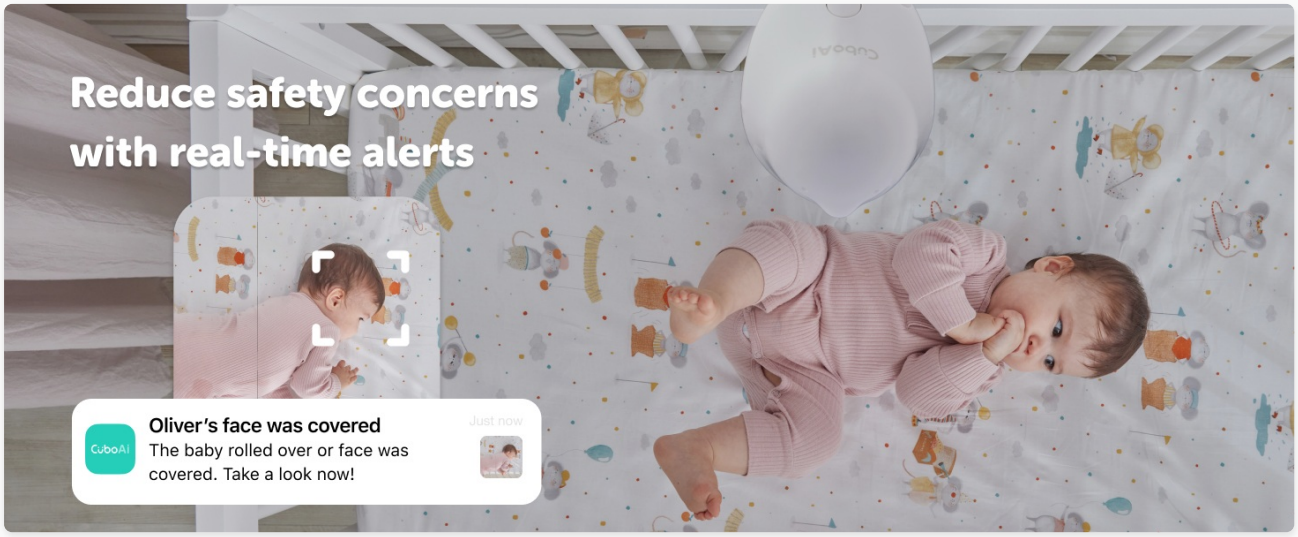

Image: A baby sleeping in a crib with an overlay showing a real-time alert on a phone screen, indicating a covered face detection by the CuboAi monitor.

- **Two-Way Audio:** Use the built-in microphone and speaker to listen to your baby and speak to them remotely, providing comfort or reassurance.
- **30-Day Sleep Analytics & Lullabies:** Access detailed daily sleep reports that provide insights into sleep duration, wake times, and caregiver interactions. Schedule lullabies and white noise to play automatically when your baby is detected in the crib, aiding in sleep routines.

showing a growth chart.

- **Cough Detection:** Receive alerts and recordings for coughs, helping you monitor your baby's health.

Image: A crying baby with an overlay showing a smartphone notification for cough detection, indicating the monitor's ability to track and record coughs.

Maintenance

To ensure the longevity and optimal performance of your CuboAi Smart Baby Monitor 3, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the camera lens and body with a soft, dry, lint-free cloth. Do not use liquid cleaners, aerosols, or abrasive solvents.
- **Placement:** Ensure the monitor is placed in a well-ventilated area, away from direct sunlight, heat sources, and moisture.
- **Cable Management:** Keep all cables neatly organized and out of reach of children to prevent entanglement hazards.
- **Software Updates:** Regularly check the CuboAi app for firmware updates. Keeping your monitor's software up-to-date ensures you have the latest features and security enhancements.

Troubleshooting

If you encounter issues with your CuboAi Smart Baby Monitor 3, refer to the following common troubleshooting steps:

Issue	Possible Cause	Solution
No video feed / Offline	Poor Wi-Fi connection, power issue, app glitch.	Check Wi-Fi signal strength (5 Mbps minimum recommended). Restart the monitor by unplugging and replugging. Restart the CuboAi app. Ensure power cable is securely connected.

Issue	Possible Cause	Solution
Frequent false alerts (Covered Face/Rollover)	Incorrect camera positioning, lighting changes, baby's movement.	Ensure the camera has a clear, unobstructed view of the crib. Recalibrate the detection zones in the app. Adjust lighting in the room if it's causing shadows or glare.
No audio / Poor audio quality	Microphone/speaker obstruction, app settings, network latency.	Check app volume settings. Ensure nothing is blocking the monitor's microphone or speaker. Verify stable Wi-Fi connection.
App is slow or unresponsive	Outdated app version, device memory, network issues.	Update the CuboAi app to the latest version. Close other apps running in the background on your phone. Check your internet connection speed.

For further assistance, please refer to the in-app help section or contact customer support.
