If you encounter any issues with your C-Shaped End Table, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Table is wobbly or uneven.	Uneven floor surface; adjustable feet not properly set.	Adjust the individual adjustable feet by rotating them until the table is stable. Ensure all feet are making contact with the floor.
Glass top feels loose.	Screws securing the glass top are loose.	Gently retighten the screws that secure the glass top to the metal frame. Do not overtighten.
Scratches on the glass surface.	Abrasive objects placed directly on the glass.	Use coasters and protective pads under items. Minor scratches may be reduced with specialized glass polish (test in an inconspicuous area first).
