TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Device not charging.	Adapter not properly plugged in. Cable not properly connected to device or adapter. Device's battery is old/dead. Faulty wall outlet. Incompatible device.	Ensure adapter is fully inserted into the wall outlet. Verify both ends of the USB-C cable are securely connected. Tip: Rechargeable batteries don't last forever, the average battery lasts 1 to 3 years. If the battery is old/dead, it will not accept a charge. This is not a charger problem. If you're unsure whether the battery or charger is dead, you may need a volt meter to test the charger's output. Try a different wall outlet. Confirm your device (Zealot S78) is compatible with a 5V USB-C power supply.
Adapter feels warm during use.	Normal operation.	A slight warmth is normal during charging. If it becomes excessively hot or emits smoke/smell, immediately unplug it and discontinue use.
