Kircuit USB-C 5V DC Charging Cable

Kircuit USB-C 5V DC Charging Cable User Manual

For Zealot S56, S57, S87, S64, S39, S27 and Compatible Devices

INTRODUCTION

This manual provides essential instructions for the safe and effective use of your Kircuit USB-C 5V DC Charging Cable. Please read this manual thoroughly before use and retain it for future reference. This cable is designed to provide a reliable power supply for compatible devices, specifically various Zealot Bluetooth speakers.

SETUP

1. Unpacking

Carefully remove the Kircuit USB-C 5V DC Charging Cable from its packaging. Inspect the cable for any signs of damage. If any damage is found, do not use the cable and contact customer support.

2. Identifying Connectors

The cable features two distinct connectors:

- **USB-A Connector:** This end connects to a standard USB power source (e.g., wall adapter, computer USB port, power bank).
- **USB-C Connector:** This end connects to your compatible device (e.g., Zealot S56, S57, S87, S64, S39, S27 Bluetooth speakers).

Image: The Kircuit USB-C 5V DC Charging Cable, showing the USB-A connector on the left and the USB-C connector on the right, with the cable coiled in the center.

OPERATING INSTRUCTIONS

1. Connecting to Power Source

Insert the **USB-A connector** of the charging cable into a compatible 5V DC USB power source. Ensure the power source is functional and provides adequate power output.

2. Connecting to Device

Insert the **USB-C connector** into the charging port of your compatible device (e.g., Zealot S56, S57, S87, S64, S39, S27 Bluetooth speaker). Ensure the connection is firm and secure.

3. Charging Indication

Refer to your device's instruction manual for specific charging indicators (e.g., LED lights). The Kircuit charging cable facilitates power transfer; it does not provide charging status feedback directly.

4. Disconnecting

Once your device is fully charged or you wish to stop charging, gently pull the connectors straight out from both the power source and the device. Avoid pulling on the cable itself to prevent damage.

Important Notes:

- This cable is designed for 5V DC power delivery. Using it with incompatible voltage sources may damage the

cable or your device.

- Ensure your device's battery is not excessively old or damaged, as this may prevent proper charging regardless of the cable's functionality.

MAINTENANCE

1. Cleaning

Wipe the cable and connectors with a soft, dry cloth. Do not use liquid cleaners or abrasive materials, as these can damage the cable's insulation or connectors.

2. Storage

Store the cable in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid tightly coiling or bending the cable at sharp angles, which can stress the internal wires.

3. Inspection

Periodically inspect the cable for any signs of wear, fraying, or damage to the connectors. Discontinue use immediately if any damage is observed.

TROUBLESHOOTING

Issue: Device is not charging.

- **Check Power Source:** Ensure the USB power source is active and providing power. Try plugging another device into the same power source to verify its functionality.
- **Check Connections:** Verify that both the USB-A and USB-C connectors are fully and securely inserted into their respective ports.
- **Inspect Cable:** Examine the cable for any visible damage, kinks, or fraying. A damaged cable will not function correctly.
- **Test with Another Device/Cable:** If possible, try charging your device with a different, known-working USB-C cable, or try charging a different compatible device with this Kircuit cable to isolate the problem.
- **Device Battery Condition:** As noted in the product description, old or dead rechargeable batteries may not accept a charge. If your device's battery is old, it might be the cause.

Issue: Slow charging.

- **Power Source Output:** Ensure your USB power source provides sufficient current (amperage) for your device. Lower output power sources will result in slower charging.
- **Cable Condition:** A partially damaged cable, even if still functional, might lead to reduced charging efficiency.

SPECIFICATIONS

Feature	Detail
Brand	Kircuit
Connector Type	USB Type A to USB Type C
Cable Type	USB
Power Output	5V DC

Feature	Detail
Compatible Devices	Zealot S56, S57, S64, S39, S27 (and other compatible 7.4V DC Li-ion Battery Pack devices)
Color	Black
Special Feature	Waterproof (referring to compatible devices, not the cable itself)
Manufacturer	Shenzhen Waweis Technology Co., Ltd

WARRANTY AND SUPPORT

For warranty information and customer support, please refer to the documentation provided with your purchase or contact the retailer where the Kircuit USB-C 5V DC Charging Cable was acquired. You may also visit the Kircuit brand's official website for further assistance.

Manufacturer: Shenzhen Waweis Technology Co., Ltd
