STANLEY 33-415

Stanley 33-415 25-Foot Hi-Visibility Measuring Tape User Manual

Model: 33-415

Introduction

This manual provides instructions for the proper use and maintenance of your Stanley 33-415 25-Foot Hi-Visibility Measuring Tape. Please read this manual thoroughly before using the product to ensure safe and effective operation.

Product Overview

The Stanley 33-415 is a 25-foot measuring tape designed for durability and ease of use. Key features include:

- **Hi-Visibility Green Casing:** For easy identification on job sites.
- **Tylon Blade Coating:** Enhances durability and extends blade life.
- **Tru-Zero Hook:** Provides accurate inside and outside measurements.
- **Comfortable Rubber Grip:** For secure handling.
- **Blade Lock:** Secures the blade in position for precise marking.

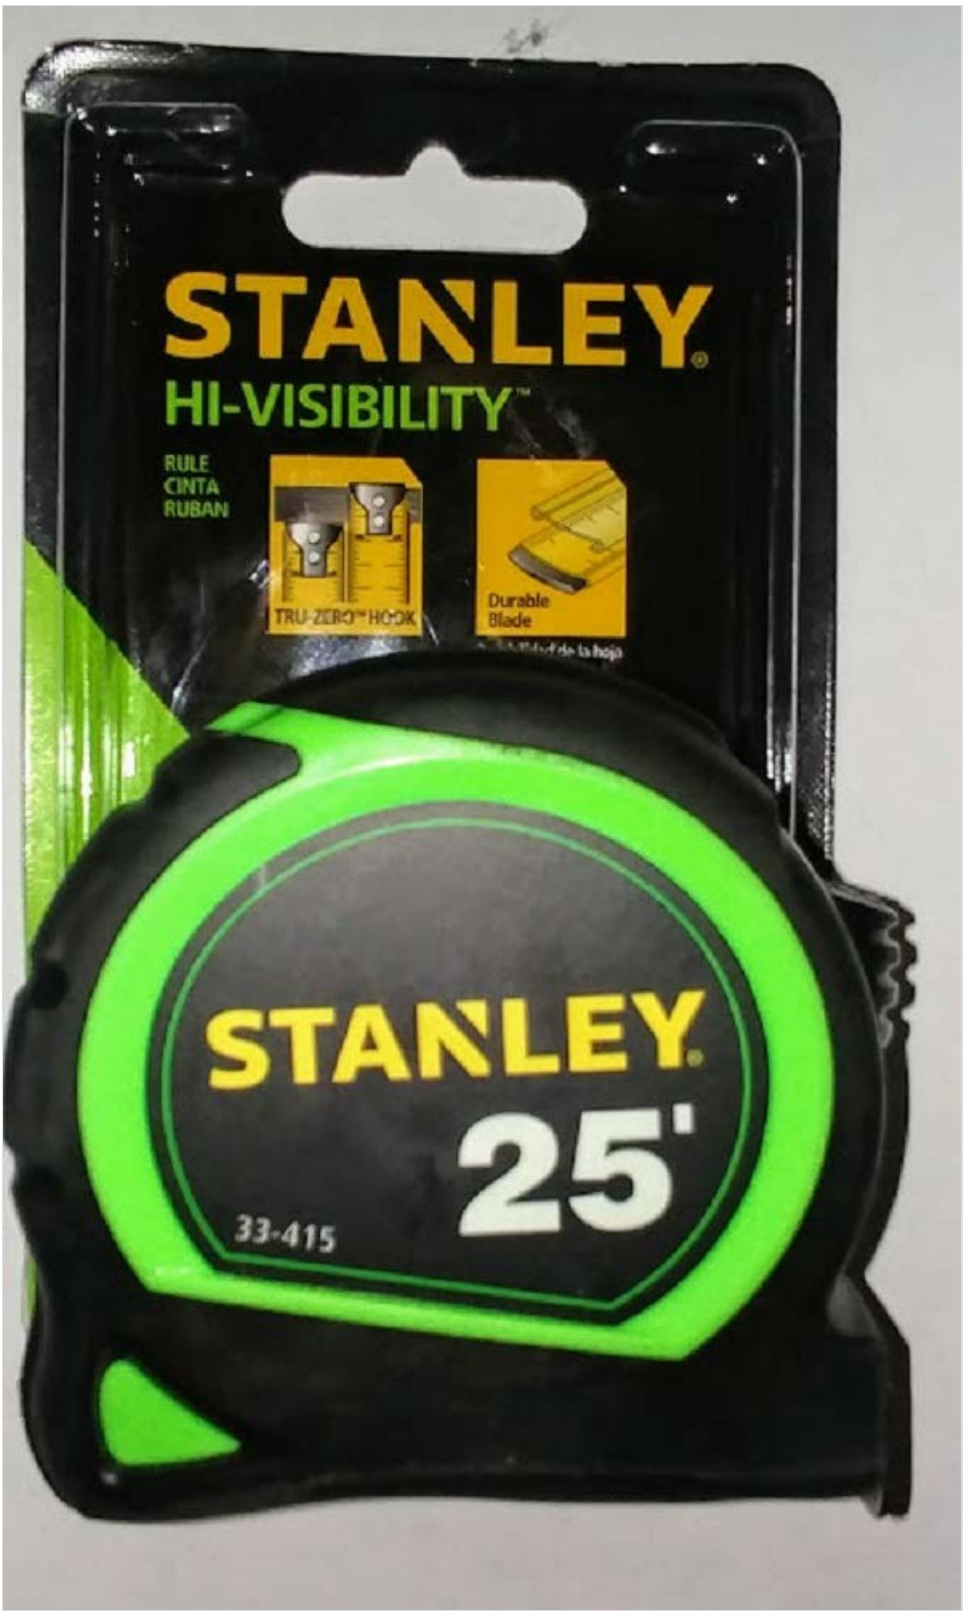

Figure 1: Front view of the Stanley 33-415 measuring tape, showing the Hi-Visibility green casing and Stanley branding, still in its retail packaging.

Figure 2: Back of the Stanley 33-415 measuring tape packaging, highlighting features such as the comfortable rubber grip, polymer-coated blade, and Tru-Zero hook. Also shows model comparisons.

Setup

1. **Unpack:** Carefully remove the measuring tape from its packaging.
2. **Inspect:** Before first use, inspect the tape for any signs of damage or defects. Ensure the blade extends and retracts smoothly.

Operating Instructions

1. Extending the Blade

Grasp the tape measure firmly. Pull the end hook of the blade to extend it to the desired length. The blade will extend freely.

2. Locking the Blade

To hold the blade at a specific length, slide the lock button forward (typically located on the top or side of the casing). This will engage the locking mechanism, preventing the blade from retracting.

3. Taking Measurements

- **Outside Measurement:** Place the end hook against the edge of the object you are measuring. Extend the tape and read the measurement at the desired point. The Tru-Zero hook accounts for its own thickness.
- **Inside Measurement:** For internal measurements (e.g., inside a window frame), push the end hook against the inside surface. Read the measurement at the desired point. The Tru-Zero hook will slide inward to compensate for its thickness, ensuring accuracy.

4. Retracting the Blade

To retract the blade, disengage the lock button by sliding it backward. Guide the blade back into the casing slowly to prevent injury or damage to the tape measure. Avoid letting the blade snap back uncontrolled.

Maintenance

- **Cleaning:** Wipe the blade and casing with a dry or slightly damp cloth to remove dust and debris. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the tape measure in a dry place, away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically check the blade for kinks, tears, or wear. Ensure the end hook is securely attached and moves freely.

Troubleshooting

Blade Does Not Retract Fully

If the blade does not retract smoothly or fully, check for the following:

- **Debris:** Ensure no dirt, dust, or small objects are lodged in the casing or along the blade path.
- **Kinks:** Check the blade for any severe kinks or bends that might be obstructing its movement.
- **Spring Mechanism:** If the issue persists after checking for debris and kinks, the internal spring mechanism may be damaged. In such cases, the unit may require replacement.

Specifications

Model Number	33-415
Blade Length	25 Feet (7.6 meters)
Blade Width	1 inch (25 mm)
Color	Hi-Vis Green
Blade Coating	Tylon Polymer

Case Material	Nylon
Item Weight	16 ounces (1 Pound)
Measurement Accuracy	+/- 1/16 inch or +/- 2 millimeters
