3.2 Attaching Nozzles

Select the appropriate nozzle for your cleaning task. Firmly push the desired nozzle onto the output port of the air duster until it clicks into place. Ensure it is securely attached before operation.

4. OPERATING INSTRUCTIONS

The Cuifati Air Duster offers both blowing and vacuum functions, along with adjustable speed settings.

4.1 Power On/Off and Speed Adjustment

- **Power On:** Press and hold the power button for a few seconds until the device starts.
- **Speed Adjustment:** Briefly press the power button to cycle through the 3 available speed modes.
- **Power Off:** Press and hold the power button again until the device shuts down.

The 3 speed modes provide varying airflow intensity:

- **Gear 1:** Up to 30 minutes working time. Suitable for light dusting.
- **Gear 2:** Up to 20 minutes working time. For general cleaning tasks.

- **Gear 3:** Up to 15 minutes working time. Provides maximum airflow for deep cleaning.

4.2 Using as an Air Duster

Attach the desired blowing nozzle (e.g., standard blowing nozzle, brush blowing nozzle). Point the nozzle towards the area to be cleaned and activate the device. Use appropriate speed for the task.

Effectively remove dust from computer components and other electronics.

5. MAINTENANCE

5.1 Cleaning the Filter

Regularly clean the filter to maintain optimal performance. To clean:

1. Ensure the device is powered off.
2. Twist and remove the dust collection cup.
3. Carefully remove the filter from the cup.
4. Tap the filter gently to dislodge dust or use a soft brush to clean it. If necessary, the filter can be rinsed with water, but ensure it is completely dry before reinserting.
5. Reinsert the dry filter and reattach the dust collection cup.

5.2 General Care

- Wipe the exterior of the device with a soft, dry cloth.

- Do not use harsh chemicals or abrasive cleaners.
- Store the device and its accessories in the provided storage bag in a cool, dry place when not in use.

6. TROUBLESHOOTING

If you encounter issues with your Cuifati Air Duster, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device does not turn on.	Low battery or no charge.	Charge the device fully.
Weak airflow/suction.	Clogged filter or nozzle.	Clean the filter and ensure nozzles are clear.
Device stops unexpectedly.	Overheating or low battery.	Allow device to cool down. Charge the battery.
Nozzle does not attach securely.	Incorrect nozzle or not fully inserted.	Ensure the correct nozzle is used and push firmly until it clicks.

If the problem persists after trying these solutions, please contact Cuifati customer support.
