SETUP AND DISPLAY

The Case IH 7120 Magnum Tractor model is ready for display directly out of its packaging. Carefully remove the model from its box, ensuring not to force any components. Place the model on a stable, flat surface away from direct sunlight, extreme temperatures, and high humidity to preserve its condition.

This model is intended for static display. Avoid rough handling or dropping to prevent damage to its intricate details.

HANDLING THE MODEL

When handling the model, always grasp it by the main body or chassis. Avoid holding it by delicate parts such as the exhaust pipe, mirrors, or hitch components, as these can be fragile and prone to breakage.

The hood is designed to open; gently lift it to view the detailed engine. Do not force the hood open beyond its intended range of motion. The wheels are functional for rolling the model on smooth surfaces, but it is not designed for vigorous play.

MAINTENANCE AND CARE

To maintain the appearance of your Case IH 7120 Magnum Tractor model, regularly dust it with a soft, dry brush or a microfiber cloth. For more stubborn dust or smudges, lightly dampen a cloth with water and gently wipe the surface, then immediately dry with a clean, soft cloth.

Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the paint finish or plastic components. Store the model in a dust-free environment, ideally within a display case, to protect it from environmental factors.

TROUBLESHOOTING

As a static display model, extensive troubleshooting is generally not required. However, if you encounter any issues:

- Loose Parts:** If a small part becomes loose, carefully reattach it using a small amount of model-safe adhesive, if appropriate.
- Stiff Moving Parts:** If the hood or wheels feel stiff, ensure no dust or debris is obstructing their movement. Do not apply excessive force.
- Damage:** For significant damage, contact the manufacturer or a specialized model repair service. Attempting complex repairs yourself may cause further damage.
