Denon Home Amplifier (DENONHOMEAMP) User Manual

Model: DENONHOMEAMP

INTRODUCTION

This manual provides essential instructions for the setup, operation, and maintenance of your Denon Home Amplifier. Please read this manual thoroughly before using the product to ensure correct and safe operation. The Denon Home Amplifier is a compact stereo amplifier designed for high-quality audio playback and multi-room streaming. It features 100W per channel Class D amplification, HEOS Built-in technology, Dolby Digital Plus decoding, and versatile connectivity options including Wi-Fi, AirPlay 2, Bluetooth, and HDMI eARC.

- Safety Documentation
- Power Cord

SETUP

Follow these steps to set up your Denon Home Amplifier:

1. **Unpacking:** Carefully remove all components from the packaging. Retain packaging for future transport or storage.
2. **Placement:** Place the amplifier on a stable, flat surface with adequate ventilation. Ensure no objects block the top grille or side vents. The compact design allows for flexible placement, including fitting two units on a standard 19-inch rack.
3. **Speaker Connection:** Connect your passive speakers to the amplifier's speaker terminals. Ensure correct polarity (+ to + and - to -) for optimal sound.

4. **Subwoofer Connection (Optional):** For enhanced bass, connect an active subwoofer to the SUB OUT port.
5. **Source Connections:**
 - **HDMI eARC (TV):** Connect your TV's HDMI eARC/ARC port to the amplifier's HDMI (eARC/ARC) TV input for high-quality audio integration.

High-Res audio

Enjoy music with superior detail, supporting ALAC, FLAC, and WAV files up to 192kHz/24-bit, as well as DSD 2.8MHz and 5.6MHz tracks.

- **Optical/Coaxial:** Connect other digital audio sources using the optical or coaxial inputs.
- **Analog (AUX):** Connect analog audio devices using the AUX input.
- **USB:** For local music playback, connect a USB storage device to the USB port.

6. **Network Connection:**

- **Wi-Fi:** Download the HEOS app on your smartphone or tablet and follow the in-app instructions to connect the amplifier to your Wi-Fi network.
- **Ethernet:** Alternatively, connect an Ethernet cable from your router to the NETWORK port for a wired connection.

7. **Power Connection:** Connect the supplied power cord to the amplifier and then to a wall outlet.

8. **Initial Setup via HEOS App:** Once powered on, open the HEOS app to complete the network setup and initial configuration. The app will guide you through connecting to your Wi-Fi and updating firmware.

OPERATING INSTRUCTIONS

Front Panel Controls

Image: Front view of the Denon Home Amplifier, showing the preset buttons (1, 2, 3), Play/Pause, and Volume Up/Down controls. A blue status light is visible at the bottom.

- **Preset Buttons (1, 2, 3):** Quickly access your favorite radio stations or playlists configured in the HEOS app.
- **Play/Pause Button:** Controls playback of current audio.
- **Volume Buttons (+/-):** Adjust the output volume.
- **Status Light:** Indicates the amplifier's current status (e.g., connected, updating).

HEOS App Control

The HEOS app is the primary interface for controlling your Denon Home Amplifier. It allows you to:

- Browse and stream music from various online services (Spotify, Tidal, Amazon Music HD, etc.).
- Access local music libraries via USB or network.
- Manage multi-room audio with other HEOS Built-in devices.
- Adjust audio settings, including high and low pass filters for speaker optimization.
- Configure input sources and settings.

Bluetooth & AirPlay 2

Connect and play music directly from your smartphone, tablet, or other compatible device. Enjoy high-quality music streaming and multi-room playback over your home Wi-Fi network via the HEOS® app or AirPlay 2.

- **Bluetooth:** Connect and play music from any Bluetooth-enabled device.

IR Learning

The amplifier supports IR learning, allowing you to program your TV remote to control basic functions like volume and power, providing a unified control experience.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the amplifier. Do not use liquid cleaners or solvents.
- **Ventilation:** Ensure the ventilation openings are not blocked to prevent overheating.
- **Firmware Updates:** Regularly check for and install firmware updates via the HEOS app to ensure optimal performance and access to new features.
- **Storage:** If storing the unit for an extended period, disconnect it from power and store it in a cool, dry place.

TROUBLESHOOTING

If you encounter issues with your Denon Home Amplifier, refer to the following common solutions:

Problem	Possible Cause	Solution
No power	Power cord not connected; power outlet issue.	Ensure power cord is securely connected. Test the outlet with another device.
No sound output	Incorrect input selected; speaker connections loose; volume too low.	Verify the correct input source is selected in the HEOS app. Check all speaker cable connections. Increase volume.
Cannot connect to Wi-Fi	Incorrect Wi-Fi password; router issues; amplifier too far from router.	Re-enter Wi-Fi password in the HEOS app. Restart your router. Move the amplifier closer to the router or use a wired Ethernet connection.
HEOS app not detecting device	Amplifier not powered on; network issues; app needs restart.	Ensure the amplifier is powered on. Verify both your mobile device and amplifier are on the same network. Restart the HEOS app.
Audio dropouts during streaming	Weak Wi-Fi signal; network congestion.	Improve Wi-Fi signal strength or use a wired Ethernet connection. Reduce network traffic.
Unit randomly shuts off or changes input	Potential firmware issue; HDMI ARC communication problem.	Ensure firmware is up to date via the HEOS app. Try disconnecting and reconnecting HDMI eARC cable. If the issue persists, contact Denon support.
Factory Reset	To resolve persistent issues or clear settings.	To perform a factory reset, press and hold the Bluetooth button while disconnecting and reconnecting power. Wait for the status light to turn amber. (Note: This will erase all settings.)
