KIDYWOLF KIDYPRINT

KIDYWOLF KIDYPRINT Instant Camera with Thermal Printing User Manual

Model: KIDYPRINT (KIDYPRINTPAR)

INTRODUCTION

The KIDYWOLF KIDYPRINT is an innovative instant camera designed for children, featuring an integrated thermal printer. This camera allows users to capture and instantly print black-and-white photos without the need for ink. It includes various creative features such as filter effects and supports external storage via an SD card.

SETUP

1. Charging the Camera

Connect the provided USB-C cable to the camera's charging port and the other end to a compatible USB power adapter (not included) or computer. The charging indicator will illuminate during charging and turn off when fully charged.

2. Inserting Thermal Paper

1. Open the paper compartment cover on the camera.
2. Insert a roll of thermal paper, ensuring the paper feeds out correctly.
3. Close the compartment cover, leaving a small portion of paper extended from the slot.

3. Inserting an SD Card

Locate the SD card slot on the camera. Gently insert a compatible SD memory card (not included) until it clicks into place. This allows for saving more photos and videos.

OPERATING INSTRUCTIONS

1. Powering On/Off

Press and hold the power button (usually located on the side or top) for a few seconds to turn the camera on or off.

2. Taking Photos

1. Point the camera at your subject.
2. Press the shutter button (typically a large button on top) to capture a photo.

3. Printing Photos

After taking a photo, the camera will automatically print it in black and white using the thermal paper. Ensure there is sufficient paper loaded.

4. Using Filter Effects

The camera features 21 fun filter effects. Navigate through the camera's menu using the directional buttons to select and apply different filters before taking a photo. Refer to the on-screen icons for filter options.

5. Video Recording

The camera supports video recording. Switch to video mode via the menu. Press the shutter button to start recording and press it again to stop. Videos are saved to the inserted SD card.

MAINTENANCE

1. Cleaning the Camera

Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth. Avoid using liquid cleaners or abrasive materials.

2. Replacing Thermal Paper

When the paper roll is depleted, open the paper compartment and replace it with a new roll of thermal paper, following the insertion steps in the Setup section.

3. Battery Care

The camera uses a Lithium Ion battery. For optimal battery life, avoid fully discharging the battery frequently and store the camera in a cool, dry place when not in use for extended periods.

TROUBLESHOOTING

- **Camera not turning on:** Ensure the battery is charged. Connect the camera to a power source using the USB-C cable.
- **No photo printing:** Check if thermal paper is correctly loaded and if there is enough paper remaining.
- **Poor print quality:** Ensure the thermal paper is suitable for the camera. Clean the print head gently with a soft cloth if smudges occur.
- **Cannot save photos/videos:** Verify that an SD card is properly inserted and has available storage space.

SPECIFICATIONS
