7. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Bed frame squeaks or makes noise.	Loose bolts; metal-on-metal friction; missing mute sponge.	Ensure all bolts are securely tightened. Verify the mute sponge bar is correctly positioned on the central beam.
LED lights are not working.	Power connection issue; remote battery dead; app not connected.	Check if the LED power adapter is securely plugged in. Replace remote control batteries. Re-pair the app via Bluetooth.
Charging ports (AC/USB/Type-C) are not working.	Main power cord not plugged in; faulty device/cable.	Ensure the bed frame's main power cord is securely plugged into a functional wall outlet. Test with a different device or charging cable.
Mattress slides on the frame.	Smooth surface of slats.	Consider placing a non-slip mattress pad or gripper between the mattress and the slats.

If the issue persists after attempting these solutions, please contact OLEVS customer support for further assistance.
