## REDTIGER 11.5Ft

# REDTIGER 11.5Ft USB Type-C Power Cord Instruction Manual

Model: 11.5Ft

## INTRODUCTION

Thank you for choosing the REDTIGER 11.5Ft USB Type-C Power Cord. This cable is specifically designed to provide a stable power supply to your REDTIGER series dash camera. Its extended length allows for flexible installation within your vehicle.

**Important Note: This power cord is for power delivery only and does not support data transfer functions.**

## SAFETY INFORMATION

---

- Ensure the power source in your vehicle provides the correct voltage and current for your dash camera.
- Do not modify or attempt to repair the power cord. Contact customer support if damaged.
- Keep the cable away from extreme heat, moisture, and sharp objects.
- Route the cable securely to avoid interference with vehicle controls or driver visibility.

## PACKAGE CONTENTS

---

The package includes:

- 1 x REDTIGER 11.5ft USB Type-C Power Cord

## SETUP INSTRUCTIONS

1. **Connect to Dash Cam:** Insert the USB Type-C end of the power cord into the corresponding port on your REDTIGER dash camera. Ensure a firm connection.

Image: Close-up view of the right-angle USB Type-C connector securely plugged into the dash camera's power input port.

2. **Route the Cable:** Carefully route the 11.5-foot power cord along the edges of your vehicle's interior, such as under the dashboard, along the A-pillar, and across the headliner. Use cable clips (not included) if necessary to secure the cable and prevent it from obstructing your view or vehicle controls.

Image: An illustration demonstrating the recommended cable routing path from the dash camera, along the windshield and A-pillar, down to the car's power outlet.

3. **Connect to Power Source:** Plug the USB Type-A end of the power cord into a compatible USB power adapter (e.g., a car charger or USB port) in your vehicle.

Image: A close-up of the USB-A connector inserted into a car charger, indicating the power input connection.

4. **Verify Power:** Once connected, your dash camera should power on, indicating a successful connection.

OPERATING INSTRUCTIONS

This power cord operates on a simple plug-and-play principle. Once properly connected to a power source and your dash camera, it will continuously supply power, allowing your dash camera to function as intended. No additional configuration is required for the power cord itself.

**Remember: This cable is exclusively for power. It cannot be used to transfer files, update firmware, or perform any data-related functions between your dash camera and another device.**

MAINTENANCE

- Keep the cable clean and free from dust and debris.
- Avoid sharp bends or kinks in the cable, as this can damage the internal wires.
- Do not pull on the cable itself when disconnecting; always grasp the connector housing.
- Store the cable in a cool, dry place when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Dash camera does not power on.	<ul style="list-style-type: none"><li>◦ Loose connection.</li><li>◦ Faulty power source (e.g., car charger).</li><li>◦ Damaged power cord.</li><li>◦ Dash camera issue.</li></ul>	<ul style="list-style-type: none"><li>◦ Ensure both ends of the power cord are securely plugged in.</li><li>◦ Test the power source with another device or try a different power adapter.</li><li>◦ Inspect the power cord for visible damage. If damaged, discontinue use and contact support.</li><li>◦ Refer to your dash camera's manual for troubleshooting its power issues.</li></ul>
Cable is too short for desired routing.	Incorrect length assessment.	The 11.5ft length is fixed. Plan routing carefully or consider alternative power solutions if this length is insufficient.
