6. TROUBLESHOOTING

Issue	Possible Cause	Solution
Uncomfortable fit / Rubbing	Laces too tight or too loose; new shoe break-in period; incorrect size.	Adjust lacing tension. Allow time for shoes to break in. Verify correct size using the sizing guide. Consider wearing thicker socks during break-in.
Squeaking sound	Moisture inside the shoe; loose insole; new outsole.	Remove insole and allow both shoe and insole to air dry completely. Reinsert insole. Squeaking from new outsoles usually subsides with wear.
Odor	Bacteria buildup from sweat.	Ensure shoes air out after each use. Use shoe deodorizers or baking soda. Wash insoles if removable and machine washable (check care label).
Sole wear	Normal wear and tear; excessive use on abrasive surfaces.	Sole wear is normal over time. To maximize lifespan, rotate with other footwear and avoid dragging feet.
