Bularie GX21380

Bularie GX21380 Medium Lift Mower Blades User Manual

Model: GX21380 | Brand: Bularie

INTRODUCTION

This manual provides essential information for the safe and effective use, installation, and maintenance of your Bularie GX21380 Medium Lift Mower Blades. Please read these instructions carefully before installation and operation to ensure optimal performance and safety.

PRODUCT OVERVIEW

The Bularie GX21380 blades are designed as medium lift blades, suitable for a 54-inch mower deck. They are engineered to provide efficient cutting performance, especially in thicker grass, ensuring a well-maintained lawn.

- **Efficient Medium Lift Design:** Recommended for optimal use on thicker grass.
- **Durable Construction:** Designed for wear resistance and high hardness.
- **Enhanced Cutting Performance:** Provides better balance and a clean cut.
- **Easy Installation:** Designed for straightforward replacement.

COMPATIBILITY

These blades are compatible with various lawn mower models, primarily those with a 54-inch mower deck. Please verify your existing part numbers and mower model before purchasing.

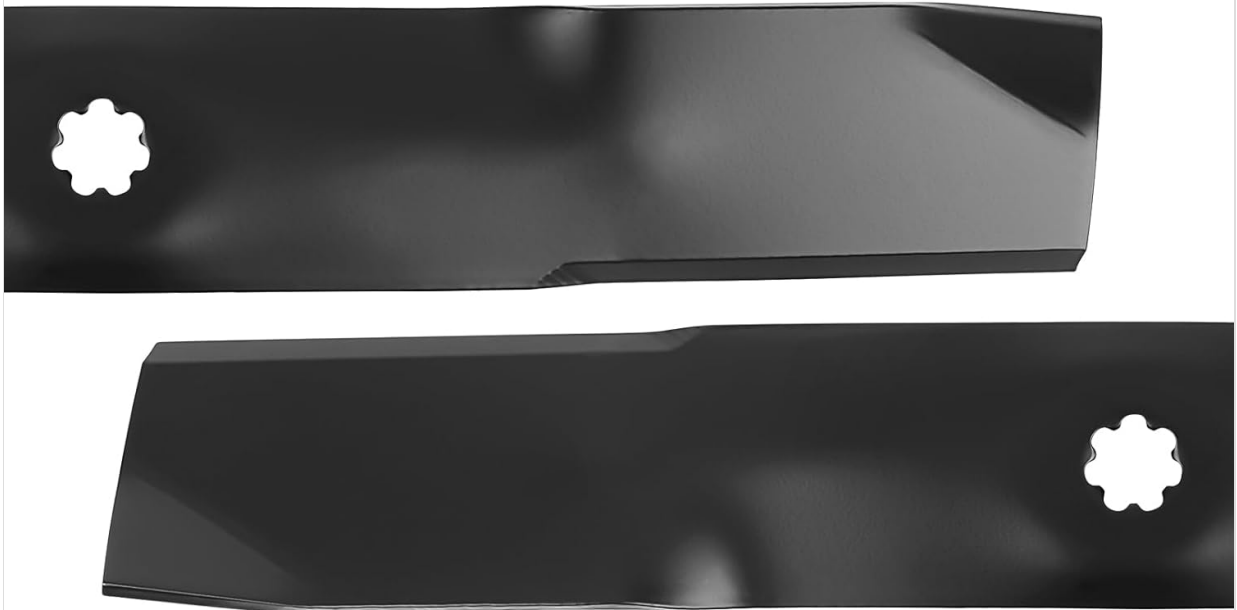

Replacement Part Numbers

- Replaces John Deere: GX21380, GY20679, GY20684, GY20686
- Replaces Stens: 330-704

- Replaces Craftsman: SPM684375001

Replacement Part Number

- ① John Deere GX21380, GY20679, GY20684, GY20686
- ② Stens 330-704
- ③ Craftsman SPM684375001

* Please check the description for more details.

INSTALLATION INSTRUCTIONS

Replacing mower blades requires caution. Always ensure the mower is turned off, the spark plug wire is disconnected, and the engine is cool before beginning. Wear appropriate safety gear, including heavy-duty gloves.

- 1. Prepare the Mower:** Park the mower on a flat, stable surface. Disconnect the spark plug wire to prevent accidental starting.
- 2. Access the Deck:** Depending on your mower model, you may need to raise the deck or tilt the mower to access the blades.
- 3. Remove Old Blades:** Use a suitable torque wrench to loosen and remove the bolts holding the old blades. You may need a block of wood to prevent the blade from turning.
- 4. Install New Blades:** Position the new Bularie GX21380 blades. Ensure the cutting edges are facing towards the ground. The blades come painted, which may make the edge feel dull initially; this paint will wear off with use, revealing the sharp edge.
- 5. Tighten Bolts:** Securely tighten the blade bolts to the manufacturer's specified torque settings. Refer to your mower's specific manual for correct torque values.
- 6. Reconnect Spark Plug:** Once all blades are securely installed, reconnect the spark plug wire.

OPERATION GUIDELINES

Once installed, your Bularie GX21380 medium lift blades are ready for use. These blades are particularly effective in cutting thicker grass, providing a clean and even cut. Always operate your lawn mower according to its manufacturer's instructions and safety guidelines.

- Ensure the mower deck is clear of debris before starting.
- Adjust cutting height as needed for your lawn type and desired finish.
- Avoid mowing over hard objects that could damage the blades.

MAINTENANCE

Proper maintenance extends the life of your mower blades and ensures consistent cutting quality.

- **Regular Inspection:** Periodically inspect blades for signs of wear, bending, or damage.
- **Cleaning:** Clean grass clippings and debris from the blades and mower deck after each use.
- **Sharpening:** Blades should be sharpened regularly to maintain cutting efficiency. If you are not experienced in blade sharpening, it is recommended to have it done by a professional or replace the blades.
- **Replacement:** Replace blades if they are severely bent, cracked, or excessively worn.

TROUBLESHOOTING

If you experience issues with your mower's cutting performance after installing new blades, consider the following:

- **Uneven Cut:** Check if blades are installed correctly with cutting edges facing down. Ensure all blades are tightened to the correct torque.
- **Excessive Vibration:** This could indicate an unbalanced blade. Inspect blades for damage or ensure they are properly secured.

- **Blades Seem Dull:** New blades come painted. The paint will wear off during initial use to reveal the sharp cutting edge. If performance doesn't improve after initial use, inspect for damage or consider sharpening.

WARRANTY INFORMATION

For specific warranty details regarding your Bularie GX21380 mower blades, please refer to the product packaging or contact Bularie customer support. General return policies may apply as per the retailer's terms.

CUSTOMER SUPPORT

If you have any questions or require further assistance with your Bularie GX21380 mower blades, please contact your retailer or visit the official Bularie website for support resources.
