

Miracase Stand Wallet

Miracase MagSafe Wallet (Stand Series) Instruction Manual

Model: Stand Wallet

INTRODUCTION

The Miracase MagSafe Wallet (Stand Series) is designed to enhance your iPhone experience by providing secure card storage and a versatile viewing stand. This wallet features a strong magnetic attachment, RFID blocking technology, and the capacity to hold up to 5 cards. Its adjustable stand function allows for both portrait and landscape viewing angles, offering convenience for various uses.

SETUP

Attaching the Wallet

Ensure your iPhone is compatible with MagSafe (iPhone 12 series and newer, excluding Mini models) or is equipped with a MagSafe-compatible case. Align the Miracase MagSafe Wallet with the MagSafe ring on the back of your iPhone or MagSafe case. The strong magnets will securely snap the wallet into place.

Figure 1: Magnetic attachment of the wallet to an iPhone.

Inserting Cards

The wallet is designed to hold up to 5 cards. Carefully slide your cards into the designated slots. The design ensures a snug fit to prevent cards from falling out while maintaining a slim profile.

OPERATING INSTRUCTIONS

Using the Adjustable Stand

The Miracase MagSafe Wallet features a durable hinge that allows it to transform into an adjustable phone stand. Gently fold the wallet open to create a triangular stand shape. You can adjust the angle from 0° to 170° to achieve optimal viewing in both portrait and landscape orientations.

Figure 3: Utilizing the wallet as an adjustable phone stand.

Accessing Cards

To quickly access your cards, use the easy access hole design at the bottom of the wallet. Push up from the bottom to slide out your cards. The bi-fold design also allows for convenient access to inner card slots.

MAINTENANCE

To ensure the longevity of your Miracase MagSafe Wallet, follow these maintenance guidelines:

- **Cleaning:** Wipe the wallet with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Overstuffing:** While designed for 5 cards, consistently overstuffing may stretch the material and reduce card security over time.
- **Magnetic Care:** Keep the magnetic area clean and free from debris to maintain optimal magnetic strength.

TROUBLESHOOTING

- **Wallet not attaching securely:**
 - Ensure your iPhone is a MagSafe-compatible model (iPhone 12 series or newer, excluding Mini models).

- If using a case, verify it is a MagSafe-compatible case. Non-magnetic cases will prevent secure attachment.
- Check for any debris between the wallet and the phone/case that might interfere with the magnetic connection.
- **Cards are difficult to insert or remove:**
 - The wallet is designed for a snug fit for up to 5 cards. Avoid forcing more cards than recommended.
 - New wallets may be slightly stiff; regular use will gradually loosen the card slots.
- **Stand function is unstable:**
 - Ensure the wallet is fully unfolded into the stand position and placed on a flat, stable surface.
 - Adjust the angle carefully to find a stable viewing position.
- **Concerns about card demagnetization or data theft:**
 - The wallet features a secure RFID blocking system and metallic mesh lining to prevent unauthorized scanning and demagnetization of your cards.
 - This protection is integrated into the wallet's design.
