UGREEN 35512

UGREEN Uno USB C to USB C Cable 100W Instruction Manual

1. PRODUCT OVERVIEW

The UGREEN Uno USB C to USB C Cable is designed for efficient power delivery and data transfer. It supports up to 100W fast charging and data transfer speeds of 480Mbps. The cable features a durable nylon braided design and an integrated LED display to indicate charging status.

2. KEY FEATURES

- **100W USB C Fast Charging:** This cable supports Power Delivery (PD) up to 100W, enabling rapid charging for compatible devices when paired with an appropriate power adapter.

Image: UGREEN Uno USB C Cable connected to a MacBook Pro 16 inch, illustrating 100W fast charging capability.

- **480Mbps Data Transfer:** Facilitates data synchronization and file transfers at speeds up to 480 Megabits Per Second.

3. SETUP AND CONNECTION

1. Connect one end of the UGREEN Uno USB C to USB C Cable to a compatible USB-C power adapter (not included).
2. Connect the other end of the cable to the USB-C port of your device (e.g., smartphone, tablet, laptop).
3. Ensure both connections are secure. The LED display on the cable's connector should light up, indicating an active charging connection.

4. OPERATING THE LED DISPLAY

The UGREEN Uno USB C Cable features an intelligent LED display on one of its connectors. When the cable is properly connected to a power source and a compatible device, and charging is active, the LED display will illuminate with a 'smiley face' or 'eyes' pattern.

This visual indicator confirms that the cable is functioning and a power connection has been established. Please note that the LED display is designed to show connection status and does not provide real-time wattage or data transfer speed information.

5. MAINTENANCE AND CARE

- Avoid bending the cable sharply, especially near the connectors, to prevent internal damage.
- Store the cable neatly coiled to prevent tangling and kinking. The included cable tie can assist with this.
- Keep connectors clean and free from dust or debris. Use a dry, soft cloth to wipe them if necessary.
- Do not expose the cable to extreme temperatures or moisture.

6. TROUBLESHOOTING

Cable not charging or slow charging:

- Ensure both ends of the cable are securely connected to the power adapter and the device.
- Verify that your power adapter is compatible with your device's charging requirements and supports Power Delivery (PD).
- Check if your device's USB-C port is clean and free from obstructions.
- Try using a different power adapter or a different USB-C port on your device to rule out issues with the power source or device port.

LED display not lighting up:

- Confirm that the cable is properly connected at both ends and that power is being supplied by the adapter.
- The LED display only activates when an active charging connection is detected. If no power is flowing, the LED will remain off.

7. TECHNICAL SPECIFICATIONS

Feature	Specification
Brand	UGREEN
Model	35512
Connector Type	USB Type C (Male-to-Male)
Cable Type	USB-C to USB-C Cable
Power Delivery	Up to 100W Fast Charging
Data Transfer Rate	480 Megabits Per Second
Special Feature	LED Smile Expression Light, Nylon Braided

Outer Material	Aluminum and Nylon Braid
Maximum Voltage	20 Volts (AC)
Item Weight	0.12 Kilograms
Specification Met	CE, UL, USB-IF

8. WARRANTY AND SUPPORT

For warranty information, technical support, or any inquiries regarding your UGREEN Uno USB C to USB C Cable, please refer to the official UGREEN website or contact their customer service directly. Keep your purchase receipt for warranty claims.

ASK A QUESTION ABOUT THIS MANUAL

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page’s manual context to help answer it.
