MAINTENANCE

General Care

The Dangbei N2 features a fully-sealed optical engine, which helps prevent dust from entering and affecting image quality. Keep the projector in a clean, dry environment. Regularly wipe the exterior with a soft, dry cloth.

Lamp Life

The projector's light source has a lifespan of approximately 30,000 hours, ensuring long-term use without frequent bulb replacement.

TROUBLESHOOTING

Common Issues & Solutions

- **No Image/Poor Image Quality:** Ensure the power cable is securely connected and the projector is powered on. Check focus and keystone settings. Verify input source if using external devices.
- **Remote Control Not Responding:** Ensure batteries are correctly inserted and charged. Point the remote directly at the projector. If the remote is lost, note that physical controls on the projector are limited, and a replacement remote may be necessary for full functionality.
- **App Issues (e.g., Hulu/Disney+ not working):** While Netflix, YouTube, and Prime Video are officially licensed, some third-party apps may have compatibility issues or require specific updates. Check the App Assistant for available updates or alternative apps.
- **No Sound:** Check volume levels on both the projector and the source device. Ensure external speakers are properly connected via Bluetooth or audio cable.
