onerbl 26V AC-DC Adapter (Compatible with Aspiron AS-CA028 Series)

Onerbl 26V AC-DC Adapter User Manual

For Aspiron AS-CA028 Series Cordless Stick Vacuum Cleaners

Model: 26V AC-DC Adapter

1. Introduction

This manual provides instructions for the safe and effective use of your Onerbl 26V AC-DC Adapter. This power supply is designed to operate and charge the battery of compatible devices, specifically the Aspiron AS-CA028, CA028-US-1, and CA028-US1 21.6V cordless stick vacuum cleaners. Please read this manual thoroughly before use and retain it for future reference.

2. Important Safety Information

- **Compatibility:** Use this adapter only with devices specified as compatible (Aspiron AS-CA028 series vacuum cleaners). Using it with incompatible devices may cause damage or injury.
- **Power Source:** Connect the adapter only to a properly grounded electrical outlet with the correct voltage (100-240VAC, 50/60Hz).
- **Environment:** Do not expose the adapter to water, moisture, or extreme temperatures. Use indoors only.
- **Damage:** Do not use the adapter if the cord or plug is damaged. Do not attempt to open or repair the adapter. Contact qualified service personnel.
- **Ventilation:** Ensure adequate ventilation around the adapter during use. Do not cover it.
- **Children:** Keep the adapter out of reach of children.
- **Battery Condition:** If the connected device's battery is old or dead, it may not accept a charge. This is typically a battery issue, not an adapter malfunction. A voltmeter can be used to test charger functionality.

3. Setup and Connection

1. **Unpack:** Carefully remove the Onerbl 26V AC-DC Adapter from its packaging.
2. **Inspect:** Check the adapter and its cable for any visible damage. Do not use if damaged.
3. **Connect to Device:** Insert the DC output plug of the adapter into the charging port of your Aspiron AS-CA028 series vacuum cleaner. Ensure a secure connection.
4. **Connect to Power Outlet:** Plug the AC input plug of the adapter into a standard electrical wall outlet (100-240VAC,

50/60Hz).

Figure 3.1: The Onerbl 26V AC-DC Adapter connected to a power strip, ready for use with a compatible device. Ensure the adapter is fully inserted into the power outlet.

4. Operating Instructions

Once properly connected, the Onerbl 26V AC-DC Adapter will begin to supply power to your Aspiron AS-CA028 series vacuum cleaner. This allows for both direct operation of the vacuum cleaner from an electrical outlet and charging of its internal 21.6V Li-ion battery.

- **Charging:** When the vacuum cleaner is off and connected to the adapter, its battery will charge. Refer to your vacuum cleaner's manual for specific charging indicators (e.g., LED lights).
- **Direct Power:** The adapter can also power the vacuum cleaner directly while it is in use, provided the battery has sufficient charge or is being charged.

Figure 4.1: Front and side view of the Onerbl 26V AC-DC Adapter. The label indicates input voltage (100-240VAC, 0.3A, 50/60Hz) and output voltage (26VDC).

5. Care and Maintenance

- **Cleaning:** Disconnect the adapter from the power outlet and the device before cleaning. Wipe the exterior with a soft, dry cloth. Do not use liquid cleaners or solvents.
- **Storage:** Store the adapter in a cool, dry place when not in use. Avoid wrapping the cable too tightly around the adapter to prevent damage.
- **Cable Care:** Do not bend, twist, or pinch the power cord excessively. Avoid placing heavy objects on the cord.

6. Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Device not charging/powering on.	Adapter not properly plugged in. Power outlet is not active. Device's charging port is damaged. Device's battery is faulty or completely depleted. Adapter is faulty.	Ensure both ends of the adapter are securely connected. Test the power outlet with another device. Inspect the device's charging port for debris or damage. As noted, old/dead batteries may not accept a charge. This is a battery issue. If possible, test the adapter with another compatible device or use a voltmeter to check its output.
Adapter feels unusually hot.	Overload or poor ventilation. Internal fault.	Ensure the adapter is not covered and has adequate airflow. Disconnect immediately and cease use. Contact support.

Note: Rechargeable batteries have a limited lifespan (typically 1 to 3 years). If your device's battery is old or dead, it may not accept a charge, which is a battery issue, not an adapter fault. A voltmeter can confirm if the charger is supplying power.

7. Product Specifications

- **Input:** 100-240VAC, 0.3A, 50/60Hz
- **Output:** 26VDC
- **Compatibility:** Aspiron AS-CA028, ASCA028, CA028, CA028-US-1, CA028-US1, CA028US1 21.6V 2500mAh Li-ion Battery Cordless Stick Vacuum Cleaner
- **Cable Length:** Approximately 76 inches (193 cm)
- **Dimensions (Adapter Body):** Approximately 2.6 inches (length) x 1.6 inches (width) x 1.2 inches (height)
- **Manufacturer:** Shenzhen Waweis Technology Co., Ltd
