VEVOR MA071

VEVOR Through The Wall Drop Box Deposit Safe MA071 Instruction Manual

Brand: VEVOR | Model: MA071

1. Product Overview

The VEVOR Through The Wall Drop Box Deposit Safe MA071 is a robust and secure solution for mail and package delivery. Constructed from heavy-duty steel with a rust-resistant powder coating, it is designed for durability and protection against the elements. This unit features a rainproof design, a spacious storage compartment, a secure combination lock, and a convenient preview window.

Rainproof Design: The drop box features a safety rainproof design with a large shield over the delivery slot, ensuring mail remains dry. It includes rubber pads and drainage holes at the bottom to prevent water accumulation.

Large Storage Capacity: The storage box measures 12.5 x 6.3 x 16.9 inches, offering 0.74 cubic feet of space. The 1.6 x 9.8 inch (40 x 250mm) slot accommodates smartphones, envelopes, and small packages.

2. Setup and Installation

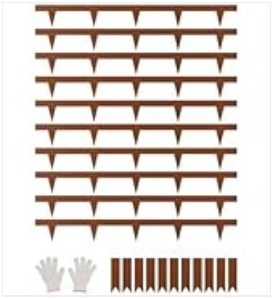

This drop box is designed for through-the-wall installation and is compatible with various wall types, including brick, concrete, and wood-framed walls. The adjustable slides accommodate wall thicknesses from 2.8 to 7.9 inches (70-200mm).

2.1 Included Components

- 1x Drop Box Unit
- 1x Outer Delivery Port
- 1x Inner Delivery Port
- 1x Silicone Mesh Mat
- 4x Small Self-tapping Wire + 4x Small Plastic Expansion Tube
- 4x M4 Screws + 4x Large Self-tapping Wire + 4x Large Plastic Expansion Tube

2.2 Installation Steps

1. **Prepare the Wall Opening:** Measure and cut an appropriate opening in your wall to accommodate the drop box. Ensure the opening is sized correctly for the main body and the adjustable slides. The wall thickness should be between 2.8-7.9 inches (70-200mm).
2. **Install the Outer Delivery Port:** Fix the outer delivery port and its mounting hardware to the exterior side of the wall opening using the provided screws. Ensure it is securely fastened and level.
3. **Insert the Drop Box:** Carefully slide the main drop box unit into the wall opening from the interior side. The adjustable slides should align with the wall thickness.
4. **Secure the Drop Box:** Secure the drop box to the interior wall using the remaining screws and expansion tubes. Ensure the unit is stable and flush with the wall surface.
5. **Insert the Inner Delivery Port:** Attach the inner delivery port to the interior side of the drop box, ensuring it aligns with the drop slot.
6. **Place Silicone Mesh Mat:** Position the silicone mesh mat at the bottom of the storage compartment to provide cushioning and additional moisture protection.

Installation Overview: Visual guide for the installation process.

3. Operating Instructions

3.1 Using the Drop Slot

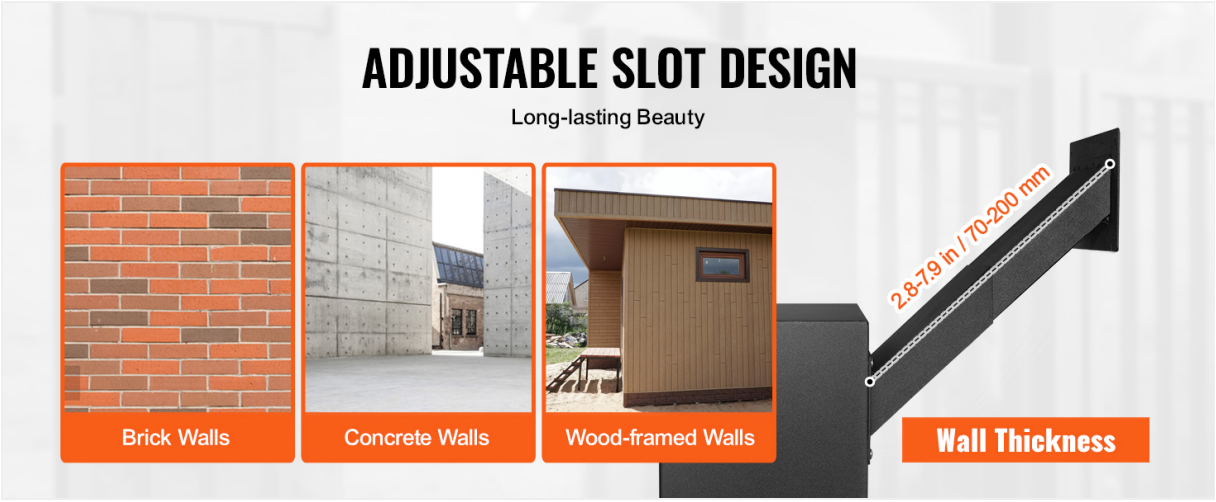

To deposit items, simply lift the outer delivery port cover and place mail, envelopes, or small packages into the slot. The internal baffle system ensures items drop securely into the storage compartment and prevents unauthorized retrieval.

3.2 Combination Lock Operation

The drop box is equipped with a 3-digit combination lock for secure access. The factory default combination is typically 0-0-0. Refer to the lock's specific instructions for initial setup if different.

Setting a New Combination:

1. Open the drop box door using the current combination.
2. Locate the reset button hole on the side of the lock mechanism (often requires a pointed object like a pen tip).
3. While holding the reset button, set your desired 3-digit combination by rotating the number wheels.
4. Release the reset button. Your new combination is now set.
5. Test the new combination with the door open before closing it.

Combination Lock: Details on the lock mechanism and how to reset the password.

3.3 Accessing Stored Items

To retrieve items, enter the correct combination on the lock and open the main access door. The spacious interior allows for easy collection of deposited mail and packages.

Preview Window: A 2x4 inch (50x100mm) visual window allows you to check for mail without opening the box.

4. Maintenance

Regular maintenance ensures the longevity and optimal performance of your VEVOR Through The Wall Drop Box.

- **Cleaning:** Wipe the exterior and interior surfaces with a soft, damp cloth to remove dust and dirt. Avoid abrasive cleaners that could damage the rust-resistant coating.
- **Lock Mechanism:** Periodically check the combination lock for smooth operation. If it becomes stiff, a small amount of graphite lubricant can be applied.
- **Drainage Holes:** Ensure the drainage holes at the bottom of the box are clear of debris to allow for proper water runoff.
- **Structural Integrity:** Inspect the mounting hardware and the overall structure for any signs of loosening or damage. Tighten screws as needed.

Durable Construction: Made from heavy-duty steel with a rust-resistant powder coating for long-lasting performance.

5. Troubleshooting

If you encounter issues with your VEVOR Through The Wall Drop Box, refer to the following common solutions:

- **Combination Lock Not Opening:** Ensure you are entering the correct 3-digit combination. If you forgot the combination, and the door is currently open, you can reset it following the instructions in Section 3.2. If the door is closed and you cannot recall the combination, contact VEVOR support.
- **Items Getting Wet:** Verify that the outer delivery port cover is closing properly and that the internal baffle is not obstructed. Check the drainage holes for blockages. Ensure the unit is installed correctly within the wall to prevent water ingress.
- **Difficulty Depositing Items:** Check the dimensions of the item against the slot size (1.6 x 9.8 inches). Ensure the outer delivery port is fully open.
- **Loose Installation:** If the unit feels wobbly or loose, re-check and tighten all mounting screws. Ensure the wall opening was cut to the correct dimensions for a snug fit.

6. Specifications

Item Model Number	MA071
Material	Alloy Steel
Color	Black
Wall Thickness Compatibility	2.8 - 7.9 inches (70 - 200 mm)
Input Slot Size	1.6 x 9.8 inches (40 x 250 mm)
