VANPORE BJ131

VANPORE BJ131 Ash Vacuum Cleaner User Manual

Model: BJ131

1. Important Safety Instructions

Please read all instructions carefully before using the VANPORE BJ131 Ash Vacuum Cleaner. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- **Do not vacuum hot ash.** Ensure all ash is completely cold before vacuuming. Hot ash can cause fire and damage to the vacuum.
- This appliance is for dry ash only. Do not use for liquids or wet materials.
- Always ensure the filters are correctly installed before operation.
- Do not operate the vacuum with a damaged cord or plug. If damaged, contact customer support.
- Keep hair, loose clothing, fingers, and all parts of the body away from openings and moving parts.
- Unplug from the outlet when not in use and before cleaning or servicing.
- The vacuum features a temperature control safety function. If the motor overheats, the unit will automatically shut off. Unplug the unit and allow it to cool down before resuming operation.

Image: The vacuum's temperature control system ensures safety by preventing overheating. Icons indicate temperature protection, overheat auto-off, and the need to unplug for motor cool-down.

2. Package Contents

Verify that all components are present in the package:

- Container lid
- Container with 157" power cable
- User manual (this document)
- Metal suction hose

- Aluminum suction tube
- Extension wands (2x)
- Wheel holder with wheels
- Crevice nozzle
- Floor nozzle
- HEPA cartridge filter
- Flame retardant filter bag

3. Assembly Instructions

Follow these steps to assemble your ash vacuum cleaner:

1. **Attach the Wheels:** Securely insert the wheels into the wheel holder base.
2. **Install Filters:** Place the flame retardant filter bag inside the container, ensuring it covers the inner mesh. Then, install the HEPA cartridge filter onto the central post, twisting to secure it.
3. **Secure the Lid:** Place the container lid onto the container, aligning the latches. Close the latches firmly to seal the lid.
4. **Connect Hose:** Attach the metal suction hose to the intake port on the side of the container.
5. **Attach Accessories:** Connect the aluminum suction tube or extension wands to the end of the metal hose, then attach the desired nozzle (crevice or floor nozzle).

4. Operating Instructions

4.1 Vacuuming Ash

The VANPORE BJ131 is designed for efficient cleaning of cold ash from various sources.

- Ensure the ash is completely cold before vacuuming.
- Plug the power cord into a suitable electrical outlet.

- Turn on the vacuum using the On/Off switch located on the lid.
- Use the appropriate nozzle to vacuum ash from fireplaces, pellet stoves, wood stoves, fire pits, or BBQ grills. The crevice nozzle is ideal for tight corners, while the floor nozzle is suitable for larger flat surfaces.
- After use, turn off the vacuum and unplug it.

4.2 Blower Function

The ash vacuum can also function as a blower for light debris.

- To activate the blower function, detach the metal suction hose from the intake port.
- Connect the hose to the air outlet port located on the lid.
- Plug in the power cord and turn on the vacuum. The unit will now blow air from the hose.
- This function is suitable for clearing leaves, sawdust, or other light, dry debris.

Image: A split image illustrating the dual functionality of the vacuum: one part shows ash being vacuumed, and the other shows leaves being blown, highlighting its versatility.

5. Maintenance

Regular maintenance ensures optimal performance and extends the life of your ash vacuum.

5.1 Emptying the Container

- Unplug the vacuum from the power outlet.
- Unlatch the container lid and carefully remove it.
- Lift out the filter assembly.
- Empty the collected ash into a suitable disposal container.

5.2 Cleaning the Filters

The HEPA cartridge filter and flame retardant filter bag are reusable and should be cleaned regularly.

- **HEPA Cartridge Filter:** Gently tap the filter to dislodge accumulated ash. For a deeper clean, rinse the filter under cold running water. Ensure the filter is completely dry before reinstallation to prevent damage to the motor.
- **Flame Retardant Filter Bag:** Shake off excess ash. The bag can also be rinsed with water and must be completely dry before reuse.

6. Troubleshooting

Refer to this section for common issues and their solutions.

Problem	Possible Cause	Solution
No power	Not plugged in; power outlet fault; damaged cord/plug	Check power connection; test outlet; contact customer support if damaged.
Reduced suction	Clogged hose/nozzle; full container; dirty filters	Clear obstructions; empty container; clean or replace filters.
Motor stops during operation	Overheating protection activated	Unplug the unit and allow it to cool down for at least 30 minutes before restarting. Ensure filters are clean and not obstructed.
Ash escaping exhaust	Filters improperly installed or damaged	Check filter installation; clean or replace damaged filters.

7. Specifications
