A full charge takes approximately 1.5 hours and provides up to 120 minutes of cordless operation.

Attaching Guide Combs

Select the desired guide comb (3mm, 6mm, 9mm, or 12mm) based on your preferred hair length. Align the comb with the trimmer's blade and push it firmly until it clicks into place. To remove, gently pull the comb away from the blade.

Initial Blade Oiling

For optimal performance and longevity, apply a small drop of the included lubricating oil to the blades before the first use. Turn the trimmer on for a few seconds to distribute the oil, then wipe off any excess.

5. OPERATING INSTRUCTIONS

Powering On/Off

To turn the trimmer ON, slide the lower button upwards. To turn it OFF, slide the button downwards.

Adjusting Blade Length

The upper button allows you to adjust the blade cutting length individually. Slide it up or down to select your desired precision setting (1-3mm).

Trimming Techniques

For best results, always trim against the direction of hair growth. Use smooth, even strokes. Start with a longer guide comb if you are unsure of the desired length, and gradually switch to shorter combs as needed. The trimmer

is suitable for:

- **Hair Cutting:** Use appropriate guide combs for overall hair length.
- **Beard Trimming:** Define beard lines and maintain desired length.
- **Lining and Edging:** Use the precision T-blade without a comb for sharp lines around the neckline, sideburns, and beard edges.
- **Body Hair Trimming:** Can be used for general body grooming. The device is water-safe for use in the shower, but should not be submerged.

6. MAINTENANCE

Cleaning the Blades

After each use, turn off the trimmer and use the included cleaning brush to remove any loose hairs from the blades. For a more thorough cleaning, the blade head can be detached (refer to the diagram in Section 3 for blade removal). The trimmer is water-safe, allowing for rinsing of the blade head under running water. Ensure the blade head is completely dry before reattaching.

Lubricating the Blades

Regularly apply a small drop of the provided lubricating oil to the blades every few uses, or as needed, to maintain optimal cutting performance and prevent rust. Turn the trimmer on briefly to distribute the oil, then wipe off any excess.

Storage

Store the trimmer and its accessories in a cool, dry place, away from direct sunlight and moisture. Keep out of reach of children.
