Troubleshooting

• **Controller Not Connecting:**

Ensure the controller is fully charged. Verify that you are using the correct button combination (e.g., 'RB'+ 'Home' for iOS/Android/PC, 'RT'+ 'Home' for Switch, 'B'+ 'Home' for PS Remote Play) to enter the appropriate pairing mode. Check your device's Bluetooth settings to ensure it is discoverable and that no other controllers are interfering. Try restarting both the controller and your device.

• **Buttons Not Responding or Sticking:**

If buttons feel sticky or fail to register, ensure the controller is clean and free of debris. If the issue persists, it may indicate a hardware fault. Contact customer support if the product is new.

• **Joystick Drift:**

While Hall effect joysticks are designed to minimize drift, if you experience unintended input, try recalibrating the controller through your device's settings if available. Ensure the controller's firmware is up to date.

• **ABXY Buttons Mismatched in Game:**

If the in-game button prompts do not match the physical buttons, press 'Y' + 'A' + 'HOME' simultaneously to switch the ABXY key value between Switch and Xbox layouts.

• **PS Remote Play Connection Issues:**

Ensure your PS Console is set up for Remote Play and is either on or in Rest Mode. Verify that your mobile device and PS Console are on the same network for optimal performance. If using mobile data, ensure it's enabled in the PS Remote Play app settings.

• **Xbox Remote Play/Steam Link Connection Issues:**

Your PC/Xbox console and mobile device must be connected to the same network. For Steam Link, ensure Steam is running on your PC and the PC is powered on.
