## 4. OPERATING INSTRUCTIONS

### 4.1 Charging Devices

The power bank offers multiple output options to charge your devices:

#### 1. Using Built-in Cables:

- Identify the correct built-in cable (Type-C, Micro-USB, or Lightning) for your device.
- Gently pull out the desired cable from its storage slot.
- Connect the cable to your device's charging port.

- The power bank will automatically begin charging.

## 2. Using the USB-A Output Port:

- Connect your device's charging cable (USB-A end) to the USB-A output port on the power bank.
- Connect the other end of your cable to your device.
- The power bank will automatically begin charging.

The power bank supports simultaneous charging of up to four devices using its three built-in cables and one USB-A port.

## 6. TROUBLESHOOTING

- **Power bank not charging:**

- Ensure the charging cable is securely connected to both the power bank's input port and the power source.
- Verify that the wall adapter or USB port is functional.
- Try a different charging cable or power source.

- **Device not charging from power bank:**

- Check if the power bank has sufficient charge (indicated by LED lights).
- Ensure the built-in cable or your external cable is correctly and securely connected to your device.
- Confirm that your device is compatible with the power bank's output specifications.
- Try a different output port or cable.

- **Slow charging:**

- Ensure both the power bank and your device support fast charging protocols.
- Using multiple output ports simultaneously may reduce individual charging speeds.
- Verify that the charging cable used is capable of fast charging.
