GIFEHU J701

GIFEHU GPS Navigator User Manual

MODEL: J701

Your reliable companion for navigation in cars, trucks, and RVs.

1. Introduction

Thank you for choosing the GIFEHU J701 GPS Navigator. This device is designed to provide accurate and reliable navigation for various vehicle types, including cars, trucks, and RVs. It comes preloaded with the latest 2025 North American maps and offers advanced features such as customized routing, intelligent voice guidance, and comprehensive POI search capabilities. Please read this manual carefully to ensure proper use and optimal performance of your new GPS navigator.

2. Package Contents

Upon opening the package, please verify that all the following items are included:

- GPS Navigator (J701)
- Car Charger
- USB Cable
- Suction Cup Holder
- Rear Holder
- Sun Visor
- User Manual (this document)

● GPS navigator x1

● Mount x1

● Sunshade x1

● Car Charger x1

● USB Cable x1

● User Manual x1

3. Setup

1. **Initial Charging:** Before first use, fully charge the GPS navigator using the provided car charger or USB cable. This ensures stable operation and prevents screen flickering or freezing issues.
2. **Mounting:** Attach the suction cup holder to your vehicle's dashboard or windshield. Securely place the GPS navigator onto the holder using the rear holder attachment. Ensure the device is positioned safely and does not obstruct your view while driving.
3. **Power On:** Press and hold the power button (usually located on the top edge) until the screen illuminates.
4. **Map Updates:** The latest 2025 North American map (USA, Canada, Mexico) is preloaded. For other regions (UK, Europe, etc.), maps are downloadable. Our maps are updated free of charge for life. If you need to update your map, please contact our support team through Amazon.

4. Operating Instructions

4.1 Customized Route Planning

The GPS navigator supports four route options: fast, green, short, and convenient. For truck drivers, the device allows you to customize routes based on vehicle weight, length, height, and width. This feature helps avoid roads with restrictions, ensuring a safe and efficient journey.

Customized Navigation Routes

Customize routes based on vehicle dimensions to easily bypass weight, height and width restrictions

Image: Screen displaying customized navigation routes with options for different vehicle types and warnings for height/weight restrictions.

4.2 Intelligent Voice Guidance

The GPS navigation system provides clear voice prompts for turn-by-turn directions. It also includes features such as current speed camera reminders, broadcasting of road names, current speed display, and lane assistance. The device displays remaining distance and informs you of the estimated arrival time.

Image: A driver's perspective showing the GPS navigator screen with voice guidance prompts like "Speed camera ahead" and "Current speed is 75 km/h".

4.3 GPS Functionality

The GPS supports various search methods including zip code, address, coordinates, favorites, and Points of Interest (POI). It features intelligent error correction, automatically generating a new route if you deviate from the planned path. The device relies on GPS signals to provide accurate navigation.

5. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior of the device. Avoid using abrasive cleaners or solvents.
- **Storage:** When not in use for extended periods, store the GPS navigator in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the device regularly, even if not in constant use.
- **Software Updates:** Keep your device's software updated to ensure optimal performance and access to the latest features.

6. Troubleshooting

Here are some common issues and their solutions:

- **Screen flickers, freezes, and turns off?**
This is often due to low battery. Please fully charge the device before use, and this issue should be resolved.

- **How to download and update maps?**

Our maps are updated free of charge for life. If you need to update your map, please contact us through Amazon for assistance.

- **Why can't I search GPS signal outdoors?**

Stable GPS signal cannot be received indoors due to the characteristics of GPS signal, the blockage of indoor building structure, and the interference of the indoor environment. Please ensure you are in an open outdoor area to acquire a GPS signal.

- **General Issues:**

If you encounter any other problems with the product, please contact our professional support team through Amazon for assistance.

Screen flickers, freezes and turns off?

This is because of low battery, please fully charge the device before use and this will not happen.

How to download and update maps?

Our maps are updated free of charge for life. If you need to update your map, please contact us through Amazon.

Why can't I search GPS signal?

Please receive GPS signal outdoors. Stable GPS signal cannot be received indoors due to the characteristics of GPS signal, the blockage of indoor building structure and the interference of indoor environment.

If you encounter any problems about the product, you can contact us through Amazon.
