Redragon K669

Redragon Ziggs K669 Wired Gaming Keyboard

USER MANUAL

1. Product Overview

The Redragon Ziggs K669 is a compact 94-key wired mechanical gaming keyboard designed for performance and durability. It features Redragon Red hot-swappable switches, customizable RGB backlighting, and a robust construction.

2. Package Contents

- Redragon Ziggs K669 Wired Gaming Keyboard
- User Manual
- Keycap Puller (may be included)
- Switch Puller (may be included)
- Spare Switches (may be included)

3. Setup

3.1 Connecting the Keyboard

1. Locate an available USB port on your computer.
2. Plug the USB connector of the Redragon Ziggs K669 keyboard into the USB port.
3. The keyboard will automatically be recognized by your operating system. No additional drivers are typically required for basic functionality.

3.2 Software Installation (Optional)

For advanced customization of RGB lighting and other features, download the official Redragon software from the Redragon website. Follow the on-screen instructions for installation.

4. Operating Instructions

4.1 Compact 94-Key Layout

The Ziggs K669 features a compact 94-key layout, including a numeric keypad, balancing space-saving design with full functionality.

4.2 Multimedia Keys

Access multimedia functions by pressing the **FN** key in combination with the designated function keys (F1-F12). Refer to the keycaps for specific multimedia icons.

4.3 RGB Lighting Control

The keyboard offers up to 20 preset RGB backlight modes. These can be cycled directly from the keyboard. Brightness and flow speed are also adjustable without software.

PERSONALIZA TU RGB

El Ziggs te permite elegir entre 20 modos preestablecidos de retroiluminación.

- Además, puedes ajustar el brillo y la velocidad del flujo desde el mismo teclado o por medio del software.

4.4 Windows Key Lock

The keyboard includes a function to lock the Windows key, preventing accidental presses during gaming sessions.

5. Maintenance

5.1 Cleaning

To clean the keyboard, disconnect it from your computer. Use a soft, dry cloth to wipe the surface. For deeper cleaning, use a keycap puller to remove keycaps and clean underneath with compressed air or a small brush. Avoid using harsh chemicals or excessive moisture.

5.2 Hot-Swappable Switches

The Redragon Ziggs K669 features hot-swappable Redragon Red switches, allowing for easy replacement without soldering. Use the provided switch puller to carefully remove and insert switches.

SWITCHES RED

- ▶ Soportan 50 millones de clics, además son tipo box, fácilmente intercambiables (hot-swappable) y están hechos a prueba de polvo y salpicaduras.

6. Troubleshooting

- **Keyboard not responding:** Ensure the USB cable is securely connected to both the keyboard and the computer. Try a different USB port. Restart your computer.
- **RGB lighting not working:** Check if the lighting is turned off or set to a very low brightness level using the keyboard's control functions or software.
- **Specific keys not working:** If the keyboard is hot-swappable, try reseating the switch for the non-functional key. If the issue persists, consider replacing the switch.

7. Specifications

Feature	Description
