Descaling (Mineral Deposit Removal):

Mineral deposits (calcium) can build up in your coffee maker over time, affecting performance and coffee taste. The "Clean Reminder" feature will alert you when descaling is recommended.

1. Mix 1 part white vinegar with 2 parts cold water. Fill the water reservoir with this solution up to the 12-cup mark.
2. Place an empty filter (permanent or paper) in the brew basket and position the empty carafe on the warming plate.

4. Turn the coffee maker back on to complete the brewing cycle.
5. Discard the vinegar solution and rinse the carafe thoroughly.
6. Run 2-3 full cycles with fresh, cold water only to flush out any remaining vinegar taste.
