Slevoo Countertop Reverse Osmosis Water Filter and Hot Water Purifier User Manual

Model: 88778cac-5f3d-4513-b98d-80cdab19694f

1. Product Overview

This manual provides instructions for the Slevoo Countertop Reverse Osmosis Water Filter and Hot Water Purifier. This appliance is designed to provide purified and heated water for household and office use. It features a 4-stage filtration system, instant heating capabilities, and a user-friendly interface.

2. Safety Information

Please read all safety instructions before operating the appliance to prevent injury or damage. Keep this manual for future reference.

- Ensure the appliance is placed on a stable, level surface.
- Do not immerse the appliance, cord, or plug in water or other liquids.
- Keep out of reach of children.
- Use only with a grounded electrical outlet.
- Do not operate if the power cord or plug is damaged.
- This product is not recommended for well water with TDS levels exceeding 500 PPM.

3. What's in the Box

Verify that all components are present upon unpacking:

- Slevoo Reverse Osmosis System
- ROC Filter
- PPC Filter
- Drip Tray

4. Setup

The Slevoo Countertop Reverse Osmosis Water Filter is designed for plug-and-play operation, requiring no plumbing or

drilling for installation. It can be used in various locations such as kitchens, living rooms, offices, camping, and RVs, provided a power source is available.

4.1 Initial Placement

Place the unit on a flat, stable surface. Ensure there is enough space around the unit for proper ventilation and access to the water tank.

5. Operating Instructions

The Slevoo water filter provides purified water and instant heating with multiple temperature and volume options.

5.1 Filtration Process

The system utilizes a 4-stage 0.0001µm Reverse Osmosis (RO) water filtration process to remove pollutants. This includes heavy metals (lead, arsenic, aluminum), fluoride, PFAS, chlorine, chloramines, and over 1,000 other contaminants, achieving a 99.99% removal rate. The maximum supported water TDS level is 500 PPM.

Image Description: This diagram illustrates the four stages of filtration: Stage 1 (PP) removes particles, rust, sand, and dirt; Stage 2 (CTO) absorbs chlorine, odors, and chloramine; Stage 3 (RO) removes bacteria, chemicals (PFAS/PFOA/PFOS); and Stage 4 (PCF) improves water taste. It also highlights compliance with NSF/ANSI 58 standard, 90%+ TDS reduction, 1000+ contaminant reduction, and BPA-free materials.

5.2 Instant Heating Function

The advanced intelligent spiral heating technology allows for instant heating of purified water in approximately 3 seconds. Five temperature options are available to suit various needs:

- Room Temperature
- 113°F (for milk)
- 167°F (for tea)
- 185°F (for coffee)
- 199°F (for boiling water)

Image Description: This image shows the Slevoo Countertop RO Water Filter dispensing water at 113°F into a baby bottle, illustrating the instant heating feature and its convenience for preparing milk.

5.3 Water Volume Options

Select from four preset water capacity options to dispense the desired amount of water:

- 8 oz
- 16 oz
- 24 oz
- 30 oz

Image Description: This image displays the Slevoo Countertop RO Water Filter's control panel, highlighting the five temperature options (Room Temp, 113°F, 167°F, 185°F, 199°F) and four volume options (8oz, 16oz, 24oz, 30oz) available for dispensing water.

5.4 User Interface and Indicators

The control panel provides real-time information and easy operation:

- **TDS Monitoring:** Real-time display of purified water's Total Dissolved Solids (TDS) level, indicating water quality.
- **Filter Life Indicator:** Shows the remaining lifespan of the filters, prompting for timely replacement.
- **Power Saving Mode:** Automatically enters standby mode when not in use to reduce energy consumption.

6. Maintenance

6.1 Filter Replacement

The system uses two main filters: a PPC filter and an RO filter. The filter life indicator on the control panel will notify you when replacement is needed. The PPC filter typically lasts 12 months, and the RO filter lasts 24 months.

1. Turn off and unplug the appliance.
2. Open the filter compartment cover.
3. Twist the old filter counter-clockwise to unlock and pull it out.
4. Insert the new filter, align it, and twist clockwise to lock.
5. Close the filter compartment cover.
6. Reset the filter life indicator as per the on-screen instructions.

Image Description: This diagram illustrates the simple 3-second filter replacement process for the Slevoo water filter, showing how to remove and insert the PPC and RO filters. It also indicates their respective lifespans: PPC (12 Months) and RO (24 Months).

6.2 Cleaning

- Regularly clean the drip tray to prevent water accumulation.
- Wipe the exterior of the appliance with a soft, damp cloth. Do not use abrasive cleaners.
- Periodically empty and clean the raw water tank.

7. Troubleshooting

If you encounter issues with your Slevoo water filter, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No water dispensed	Water tank empty; Power not connected; Filters clogged.	Refill water tank; Check power connection; Replace filters.
Water tastes unusual	New filters not flushed; Filters need replacement.	Dispense and discard first few liters of water after filter change; Replace filters.
Slow water flow	Filters clogged; Low water pressure in tank.	Replace filters; Ensure water tank is adequately filled.
Heating function not working	Incorrect temperature selected; Appliance malfunction.	Verify temperature setting; Contact customer support if issue persists.
