## Simple Way Cat Litter Box--A03

# SIMPLEWAY Self Cleaning Cat Litter Box User Manual

Model: Cat Litter Box--A03

Brand: Simple Way

## INTRODUCTION

---

The SIMPLEWAY Self Cleaning Cat Litter Box is an advanced automatic robot litter box designed to simplify pet care with seamless filtering and a safety protection design. Featuring intelligent health monitoring and smart sensors, it ensures a fresh and comfortable toileting experience for your feline friend. This manual provides comprehensive instructions for setup, operation, and maintenance to ensure optimal performance and a clean environment.

## SAFETY INFORMATION

---

Please read all safety instructions before operating the device to prevent injury or damage. Keep this manual for future reference.

- Always place the device on a hard, flat surface. Avoid placing it on garbage mats or carpets to ensure proper sensor function and stability.
- Do not immerse the main unit in water or other liquids.
- Keep out of reach of children and pets when not in use or during maintenance.
- Ensure the power cord is not damaged and is properly connected to a suitable power outlet.
- Do not attempt to disassemble or repair the device yourself. Contact customer service for assistance.
- When your cat enters the litter box, the cat presence detector will halt rotation to ensure safety. Do not interfere with the cleaning cycle while a cat is inside.

## PACKAGE CONTENTS

---

Verify that all items are included in your package:

- Automatic Litter Box Machine with LED button and detector
- Device Drawer
- Filter Spray - Deodorant for fresh whole home, air freshener (1 unit)

- Waste Bags (2 rolls, 20 pcs)
- Cleaning Kit (brush)
- Cleaning Manual (1)
- Stickers for use
- Remote Control and AAA battery
- Litter Box Mat
- Bin

## SETUP GUIDE

---

### 1. Placement

For optimal performance and safety, place the litter box on a firm, level surface. Ensure there is at least 5-10 cm of space around the unit for proper ventilation and operation. Avoid placing it on soft surfaces like carpets or rugs, as this can interfere with the gravity sensors.

Figure 1: Correct placement on a hard, flat surface with adequate clearance.

### 2. Initial Power On and Self-Check

1. Connect the power adapter to the litter box and plug it into a wall outlet.
2. The device will perform an automatic self-check. Wait for the indicator light to turn green, indicating it is ready for use.

### 3. Filling with Litter

The SIMPLEWAY litter box is compatible with most clumping cat litters, including mixed, tofu, bentonite, and mineral types. It is unsuitable for non-clumping litters.

# Fits Most Cat Litters

**Mixed**

Length < 11 mm

**Tofu**

Length < 11 mm

 **Bentonite**

 **Mineral**

**Reminder: Unsuitable for non-clumping litters**

Figure 2: Compatible litter types for the SIMPLEWAY Self-Cleaning Cat Litter Box.

1. Ensure the litter box is in its home position (flat, not tilted).
2. Carefully pour clumping cat litter into the basin. Do not exceed the MAX fill line indicated inside the basin. Overfilling can affect cleaning performance and sensor accuracy.
3. The internal space for litter is approximately 30 liters.

## OPERATING INSTRUCTIONS

### Automatic Cleaning Cycle

The litter box is equipped with intelligent sensors to detect your cat's presence. When a cat enters, the system pauses any ongoing cleaning cycle. Cleaning automatically resumes approximately 5 minutes after your cat exits the box, ensuring a fresh environment for the next use.

Figure 3: Open-top design suitable for all cat sizes.

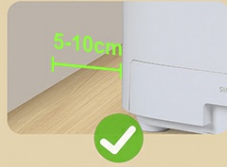

## Cleaning Modes

The SIMPLEWAY litter box offers three convenient cleaning modes:

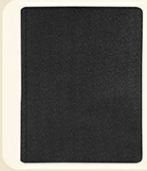

- **Automatic Mode:** The default mode, where the box cleans itself after each use, following a delay to allow litter to clump.
- **Remote Control Mode:** Use the provided remote control to initiate a cleaning cycle manually.
- **Manual Mode:** Press the cleaning button on the device to start a cleaning cycle.

## Placement Suggestion

- DO NOT place on carpet.
- Place on a firm, level surface with a little space around

## MAINTENANCE

### 1. Emptying the Waste Bin

The waste bin is located in the drawer at the front of the unit. It is recommended to empty the waste bin every 2-3 days for multiple cats or up to 7-10 days for a single cat, depending on usage.

1. Pull out the drawer located at the bottom front of the litter box.
2. Remove the used waste bag and dispose of it properly.
3. Place a new waste bag into the bin, ensuring it is securely fitted.
4. Slide the drawer back into the unit until it clicks into place.

Figure 8: Waste bin capacity and easy access for emptying.

## 2. Cleaning the Basin and Filter Mesh

Regular cleaning of the basin and filter mesh is essential for hygiene and optimal performance.

1. Unplug the device from the power outlet before cleaning.
2. Remove the basin from the main unit. The filter mesh can be detached for thorough cleaning.
3. Wash the basin and filter mesh with mild soap and water. Rinse thoroughly and ensure they are completely dry before reassembling.
4. Use the provided cleaning brush to remove any stuck litter or debris from the grates and corners.
5. Reassemble the filter mesh into the basin and place the basin back into the main unit.

Figure 9: Key components for cleaning and maintenance.

If you encounter any issues with your SIMPLEWAY Self Cleaning Cat Litter Box, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device not cleaning or getting stuck.	Litter overfill, non-clumping litter, debris obstructing mechanism, unit not on a flat surface.	Ensure litter is below MAX line. Use only clumping litter. Check for and remove any obstructions. Verify unit is on a hard, flat surface. Power cycle the device.
Persistent odor despite air purification.	Waste bin full, air freshener empty, litter not clumping effectively, infrequent cleaning.	Empty waste bin regularly. Replace air freshener refill. Ensure you are using high-quality clumping litter. Clean the basin and filter mesh more frequently.
Litter being tracked out of the box.	Cat tracking litter, insufficient litter mat.	Ensure the litter mat is properly positioned. Consider a different type of litter that tracks less.
Unit beeping or flashing red light.	Error indication, drawer not fully closed, obstruction, weight sensor issue.	Check if the waste drawer is fully inserted. Inspect for any obstructions. Ensure the unit is on a stable surface. Refer to the specific error code if displayed.

If the problem persists after attempting these solutions, please contact Simple Way customer service for further assistance.

## SPECIFICATIONS

Feature	Detail
Model Name	Automatic Self Cleaning Cat Litter Box
Item Model Number	Cat Litter Box--A03
Brand	Simple Way
Dimensions (LxWxH)	22"L x 22.4"W x 14.17"H
Item Weight	17 Pounds
