- Use appropriate wall fixings for your wall type (not included).
- Assembly requires at least two people due to the size and weight of the components.

SETUP AND ASSEMBLY INSTRUCTIONS

- 1. Prepare the Area:** Clear the bathroom area where the vanity will be installed. Ensure the wall is clean and dry.

2. **Unpack Components:** Carefully unpack all parts and lay them out on a soft, clean surface to prevent scratches. Identify all components against the parts list.
3. **Assemble the Vanity Unit:** Follow the detailed assembly diagrams provided in the separate assembly guide (not included in this manual). This typically involves attaching side panels, back panel, and drawer runners.
4. **Install Drawers:** Once the main cabinet frame is assembled, install the two drawers. The unit features a "push-to-open" mechanism.
5. **Mark Wall Mounting Points:** Determine the desired height for the vanity. Using a level, mark the positions for the wall mounting brackets on the wall. Ensure these points are structurally sound.
6. **Mount the Vanity Unit:** Securely attach the vanity unit to the wall using appropriate wall fixings (not supplied). Ensure it is level and firmly anchored.
7. **Place Basins:** Position the two ceramic Verini basins on top of the vanity unit. Ensure they are centered over the designated areas.
8. **Install Faucets and Drains:** Install your chosen faucets and drain assemblies into the basins. Connect the plumbing according to local codes and manufacturer instructions. Ensure all connections are sealed to prevent leaks.

OPERATING INSTRUCTIONS

The Isaure vanity unit is designed for straightforward use.

- **Drawers:** The unit features two drawers with a "push-to-open" mechanism. To open, gently push the front of the

drawer inward until it releases, then pull it out. To close, push the drawer firmly until it clicks into place.

- **Basins:** The ceramic basins are designed for standard bathroom use. Ensure the drain stoppers are functioning correctly to prevent water overflow.

MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your vanity unit.

- **Cleaning the Vanity Unit:** Wipe the particle board surfaces with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or excessive moisture, as these can damage the finish. Dry immediately after cleaning.
- **Cleaning the Basins:** Clean the ceramic basins with a non-abrasive bathroom cleaner and a soft sponge or cloth. Rinse thoroughly with water. Avoid using metal brushes or scouring pads that could scratch the ceramic.
- **Spills:** Immediately wipe up any water spills or splashes on the vanity unit to prevent water damage to the wood particle board.
- **Drawer Mechanism:** Periodically check the drawer runners and push-to-open mechanism for smooth operation. Do not force drawers if they stick.
