Running Board Instruction Manual for Toyota INNOVA AN140

Model: AUTO202406616 | Brand: fenqing-y

PRODUCT OVERVIEW

This manual provides detailed instructions for the installation, operation, and maintenance of your new fenqing-y Running Board Side Steps, designed for the Toyota INNOVA AN140 (2016-2024 models). These running boards are engineered to provide a secure, slip-proof, and comfortable step, enhancing safety and convenience for vehicle occupants.

PACKAGE CONTENTS

Please verify that all components are present before beginning installation:

- 2 x Running Boards
- 1 x Set of Mounting Brackets
- 1 x Installation Hardware Kit (bolts, washers, nuts)

INSTALLATION GUIDE

The fenqing-y Running Boards are designed for straightforward installation using your vehicle's existing attachment mounts. No drilling or complex modifications are typically required.

- Preparation:** Ensure your vehicle is parked on a level surface and the engine is off. Gather all tools required (e.g., wrenches, sockets - specific sizes may vary).
- Identify Mounting Points:** Locate the factory-drilled mounting points on the vehicle's chassis, typically along the rocker panel beneath the doors. These points are designed to accept the running board brackets.
- Attach Brackets:** Securely attach the mounting brackets to the identified vehicle mounting points using the provided hardware. Ensure all bolts are hand-tightened initially.

4. **Position Running Boards:** Carefully lift each running board and align it with the attached brackets. The running boards are designed to provide a wide and flat surface for sure footing.
5. **Secure Running Boards:** Attach the running boards to the brackets using the remaining hardware. Once both running boards are in place, progressively tighten all bolts to the manufacturer's recommended torque specifications (if available, otherwise ensure they are very secure).
6. **Final Check:** After installation, gently test the stability of both running boards by applying pressure. Ensure there is no wobble and all connections are firm.

USAGE GUIDELINES

Your fenqing-y Running Boards are designed for daily use to facilitate easier entry and exit from your vehicle. They provide a stable and slip-proof platform.

- Always step onto the running board with your entire foot to ensure maximum stability.
- Avoid placing excessive weight on the edges of the running board.
- Be mindful of wet or icy conditions, as these can reduce traction on any surface.

- Ensure children and elderly passengers are aware of the running board's presence to prevent trips or falls.

CARE AND MAINTENANCE

To ensure the longevity and appearance of your running boards, follow these simple maintenance tips:

- **Regular Cleaning:** Clean the running boards periodically with mild soap and water. Use a soft brush or cloth to remove dirt, mud, and road grime. Rinse thoroughly with clean water.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, solvents, or strong detergents, as these can damage the finish of the aluminum.
- **Inspect Fasteners:** Periodically check all mounting bolts and fasteners to ensure they remain tight. Vibrations from driving can sometimes loosen connections over time. Re-tighten as necessary.
- **Check for Damage:** Inspect the running boards for any signs of damage, such as dents, cracks, or corrosion, especially after off-road driving or impacts. Address any damage promptly to prevent further issues.

TROUBLESHOOTING

Most issues with running boards are related to installation or minor wear. Here are some common concerns and their solutions:

Problem	Possible Cause	Solution
Running board feels loose or wobbly.	Mounting bolts are not sufficiently tightened or have loosened over time.	Re-tighten all mounting bolts and bracket fasteners. Ensure they are secure.
Unusual noises (squeaking, rattling) from running board.	Loose fasteners, debris trapped between components, or improper alignment.	Inspect all mounting points for tightness. Clean any debris. Check for proper alignment and adjust if necessary.
Difficulty stepping onto the board due to slipperiness.	Accumulation of dirt, mud, or ice on the step surface.	Clean the running board surface thoroughly. In icy conditions, remove ice before use.

PRODUCT SPECIFICATIONS

Attribute	Detail
Brand	fenqing-y
Model Name	Running Board
Item Model Number	AUTO202406616
Manufacturer Part Number	AUTO20240618001
ASIN	B0D7SQG3NF
Material	Aluminum

Attribute	Detail
Exterior Finish	Aluminum
Color	A3
Vehicle Service Type	Passenger Car (Compatible with Toyota INNOVA AN140 2016-2024)
Date First Available	June 22, 2024

WARRANTY AND CUSTOMER SUPPORT

fenqing-y is committed to providing high-quality products and excellent customer service. Your running boards are manufactured to rigorous standards, ensuring durability and performance.

If you encounter any issues with your product, have questions regarding installation, or require assistance, please do not hesitate to contact our customer support team. We are dedicated to ensuring your satisfaction.

For support, please refer to the contact information provided with your purchase or visit the official fenqing-y store page on Amazon: [fenqing-y Store](#)

Please retain your proof of purchase for warranty claims.
