Atopskins 6-in-1 Blow Dryer Brush Set & Hot Air Styler User Manual

Model: B0D7VFNBGC

1. INTRODUCTION

Thank you for choosing the Atopskins 6-in-1 Blow Dryer Brush Set & Hot Air Styler. This versatile styling tool is designed to provide fast drying, straightening, curling, and volumizing for various hair types. Featuring negative ionic technology and multiple interchangeable attachments, it aims to simplify your hair styling routine. Please read this manual thoroughly before use to ensure safe and effective operation.

2. SAFETY INFORMATION

To reduce the risk of electric shock, burns, fire, or injury, always follow these basic safety precautions:

- Keep out of reach of children.
- Do not rinse or submerge the appliance in water or any other liquid.
- Keep the power plug and cord away from heated surfaces.
- Do not use the hair dryer while bathing or in close proximity to water.
- Always unplug the appliance immediately after use.
- Do not operate with a damaged cord or plug.
- Do not block the air openings or place on a soft surface where the air openings may be blocked.

3. PRODUCT OVERVIEW & COMPONENTS

The Atopskins 6-in-1 Blow Dryer Brush Set includes a main power handle and six professional interchangeable attachments designed for various styling needs:

- **Automatic Curlers (2 sizes):** Utilizes the Coanda effect to wrap and curl hair without extreme heat, creating lasting blowout curls.
- **Fast Dryer:** Quickly dries hair before styling, helping to maintain natural moisture.
- **Hair Straightener Brush:** Designed for smooth straightening, adding shine and volume.
- **Oval Brush:** Adds volume to thin hair with precise drying and shaping.
- **Large Oval Brush:** Creates voluminous and bouncy curls for thick hair.

No Heat Damage

Atopskins's intelligent heat control tech,
preventing irreversible heat damage
and keeping hair strong.

4. SETUP

Attaching and detaching the styling heads is a simple process:

1. Ensure the main unit is unplugged and cool before attaching or detaching any heads.
2. To attach a head: Align the desired attachment with the main unit's connection point. Push firmly until it clicks securely into place.
3. To detach a head: Locate the release button or mechanism on the main unit (refer to Figure 3). Press and hold the button, then gently twist and pull the attachment away from the main unit.

THE PERFECT GIFT FOR ALL IMPORTANT MOMENTS

For Seniors

Christmas

Birthday

Travel-ready design

Honeymoon

Party

5. OPERATING INSTRUCTIONS

The Atopskins Hot Air Styler features negative ionic technology to reduce frizz and enhance shine, along with a powerful 1000W motor and 60,000 RPM turbo flow for efficient styling.

5.1 Power and Temperature Settings

The device offers three temperature settings to suit different hair types:

- **Low (50°C):** Ideal for damaged or fine hair.
- **Mid (80°C):** Suitable for soft or normal hair.
- **High (105°C):** Recommended for thick or coarse hair.

To adjust settings, use the control switch on the main unit. The device also includes a cool shot function for setting your style.

5.2 Styling Functions

Drying: Use the Fast Dryer attachment to quickly remove excess moisture from your hair before styling. This helps protect your hair from excessive heat exposure during subsequent styling steps.

Figure 4: The Fast Dryer attachment in action, illustrating its ability to dry hair with controlled heat to prevent damage.

Straightening: Attach the Hair Straightener Brush or the Oval Brush. Work in sections, gliding the brush through your hair from roots to ends. The negative ions help to smooth the hair cuticle, reducing frizz and adding shine.

Figure 5: The Hair Straightener Brush being used to achieve smooth, sleek hair, demonstrating the effect of negative ions.

Curling: Use the Automatic Curlers. Take a section of hair (approximately 5-8cm wide) and place the end of the hair bundle near the curler. The Coanda effect will automatically draw and wrap the hair around the barrel. Hold for 10-30 seconds, then release. The bidirectional auto-rotating curling barrel allows for curls in both directions. For best results, allow curls to cool before brushing.

Figure 6: The automatic curling feature using the Coanda effect, showing hair wrapping around the barrel for effortless curls.

Volumizing: Utilize the Oval Brush or Large Oval Brush. Lift sections of hair at the roots and brush upwards and outwards to create volume. For bangs, use the appropriate brush to style them as desired.

6. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your styling tool.

- **Cleaning:** Ensure the device is unplugged and completely cool. Use a soft, damp cloth to wipe the main unit and attachments. For brush heads, carefully remove any trapped hair. Do not use abrasive cleaners or submerge parts in water.

- **Air Intake Grille:** Regularly check and clean the air intake grille at the bottom of the main unit to prevent lint and dust buildup, which can affect performance.
- **Storage:** Store the appliance and its attachments in a cool, dry place, away from moisture and direct sunlight.

7. TROUBLESHOOTING

If you encounter any issues with your Atopskins Hot Air Styler, please refer to the following common solutions:

- **Device not turning on:** Ensure the power cord is securely plugged into a working electrical outlet. Check if the power switch is in the 'ON' position.
- **Weak airflow or reduced heat:** Check the air intake grille for any blockages (e.g., dust, hair). Clean as described in the Maintenance section.
- **Attachments not staying in place:** Ensure the attachment is correctly aligned and pushed firmly until it clicks into the locked position.
- **Hair snagging:** Ensure hair is detangled before styling. Work with smaller sections of hair.
- **Curls not holding:** Ensure hair is mostly dry before curling. Use a styling product if desired. Allow curls to cool completely before disturbing them.

If the problem persists, please contact customer support.
