SETUP AND INSTALLATION

Follow these steps carefully for proper installation. It is recommended to have a qualified electrician perform the installation if you are unsure.

1. **Prepare the Installation Site:** Turn off power at the circuit breaker. Secure the mounting bracket to the ceiling junction box.
2. **Assemble the Fan Body:** Attach the downrod to the fan motor. Pass the electrical wires through the downrod.

3. **Mount the Fan:** Lift the fan assembly and hang it from the mounting bracket. Connect the electrical wires (live, neutral, ground) from the ceiling to the fan's wiring.
4. **Attach Fan Blades:** Securely attach the three ABS fan blades to the motor housing using the provided screws.
5. **Install Light Kit:** Connect the light kit cable to the fan motor. Secure the LED light source to the fan body. Attach the light cover.

Reversible Motor Function

The fan's reversible motor allows for year-round comfort.

- **Summer Mode (Forward):** Blades rotate counter-clockwise, pushing air downward to create a cooling breeze.
- **Winter Mode (Reverse):** Blades rotate clockwise, pulling air upward to circulate warm air trapped near the ceiling.
