TROUBLESHOOTING

If you encounter any issues with your Yaheetech Boucle Desk Chair, please refer to the following common troubleshooting tips:

- **Chair does not adjust height:** Ensure the pneumatic cylinder is correctly installed and the height adjustment lever is fully engaged. Sometimes, sitting firmly on the chair while pulling the lever can help.
- **Chair does not roll smoothly:** Check the casters for any hair, debris, or obstructions that might be preventing smooth movement. Ensure all casters are securely inserted into the chair base.
- **Chair feels unstable or wobbly:** Verify that all screws used during assembly are tightened securely. Check the connections between the chair base, pneumatic cylinder, and seat mechanism.
- **Backrest does not tilt:** Ensure the tilt lock lever is disengaged (pulled outwards). Adjust the tilt tension knob to a looser setting if the tilt feels too stiff.
