Yoobao Portable Charger Station User Manual

Model: Share 10000

INTRODUCTION

The Yoobao Portable Charger Station is designed to provide convenient and shared power solutions for various environments, including homes, offices, restaurants, and public spaces. This kit includes a central charging dock and five individual 10000mAh portable power banks, each equipped with a built-in charging cable for immediate use. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to ensure optimal performance and longevity of your device.

PACKAGE CONTENTS

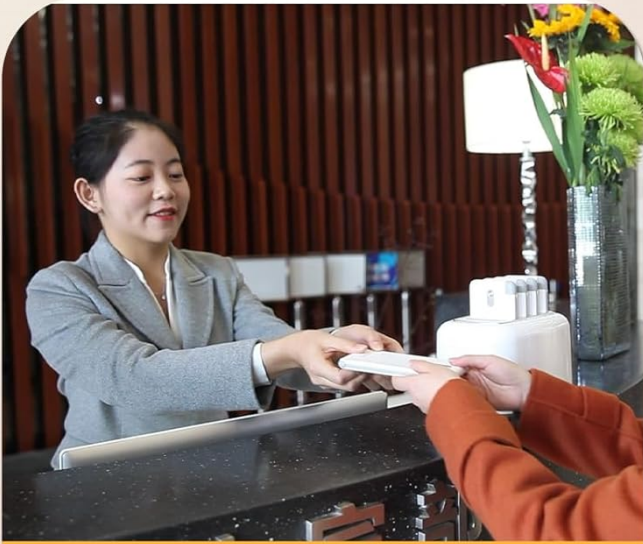

Please verify that all items listed below are included in your package:

- 1 x Yoobao Charging Station
- 5 x Yoobao 10000mAh Portable Power Banks (4 with Lightning cable, 1 with USB Type-C cable)
- 1 x AC Power Cord
- 1 x User Manual

PRODUCT OVERVIEW

The complete Yoobao Portable Charger Station, showcasing the main charging dock and one of the slim power banks actively charging a smartphone. The station holds five power banks upright.

An official video from Yoobao demonstrating the features and various use cases of the Portable Charger Station, including its portability and ease of use in different settings.

SETUP

- Unpack:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
- Position the Charging Station:** Place the charging station on a stable, flat surface away from direct sunlight, heat sources, and moisture. Ensure adequate ventilation around the unit.
- Connect Power:** Insert one end of the provided AC power cord into the AC input port on the back of the charging station. Plug the other end into a standard wall outlet (100-240V AC).
- Initial Charge of Power Banks:** Place the five portable power banks into their respective slots on the charging station. Ensure they are seated correctly. The power banks will begin charging automatically. The LED indicators on each power bank will show their charging status.

OPERATING INSTRUCTIONS

Charging the Power Banks

- Using the Charging Station:** Simply place the power banks into the charging slots. The station is designed for wireless charging of the power banks. The LED indicators on the power banks will illuminate to show charging progress.
- Using a Micro USB Cable (Not Included):** Each power bank also has a Micro USB input port. You can charge an individual power bank by connecting a Micro USB cable to this port and a USB power source.

Charging Your Devices

- Using Built-in Cables:** Each portable power bank comes with a built-in cable (4 Lightning, 1 USB Type-C). Pull out the integrated cable and connect it directly to your compatible smartphone or device.
- Using USB Output Ports on the Station:** The main charging station features two additional USB output ports (5V/2A) on the side. Connect your device's USB charging cable to one of these ports to charge directly from

the station.

- **Checking Power Bank Status:** Press the power button on the side of the power bank to check the battery level via the LED indicators.

MAINTENANCE

- **Cleaning:** Disconnect the charging station from power before cleaning. Use a soft, dry cloth to wipe down the surfaces of the station and power banks. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use for extended periods, store the unit in a cool, dry place. Ensure power banks are partially charged (around 50%) before long-term storage to preserve battery health.
- **Cable Care:** Handle the built-in cables gently. Avoid excessive bending or pulling to prevent damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Power banks not charging in the station.	Station not powered, power bank not seated correctly, dirty contacts.	Ensure AC cord is securely plugged in. Re-seat the power bank firmly in the slot. Clean metal contacts on power bank and station with a dry cloth.
Device not charging from power bank.	Power bank low on charge, incorrect cable, device issue.	Charge the power bank fully. Ensure you are using the correct built-in cable (Lightning for iPhone, USB-C for compatible devices). Test with another device or cable if possible.
One power bank not working.	Defective unit.	Contact customer support for assistance. Refer to the "Worry-free After-sales Service" section.
Built-in cable not working.	Cable damage, incorrect connection.	Ensure the cable is fully inserted into your device. Inspect the cable for visible damage. The built-in cable is removable and can be replaced if damaged.

SPECIFICATIONS

Feature	Detail
