4. SETUP

4.1. Battery Installation and Charging

- The robot contains a rechargeable Lithium Polymer battery. Use the provided charging cable to charge the robot's internal battery. A full charge provides approximately 40 minutes of operation.
- The remote control requires 2 AA batteries (not included). Insert them into the remote control's battery compartment, observing correct polarity.

4.2. Remote Control and App Pairing

The robot can be controlled via the included remote control or a mobile phone application. To establish a connection:

1. Turn on the switch of the robot.
2. Turn on the switch of the remote control. They will automatically connect. For mobile app control,

download the dedicated application and follow the in-app instructions for pairing.

6. MAINTENANCE

To ensure the longevity and optimal performance of your iATOM Johnny 5 Robot:

- Keep the robot and its components clean and free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the robot to extreme temperatures or direct sunlight for prolonged periods.
- Store the robot in a dry place when not in use.
- Regularly check for any loose connections or parts and reassemble them as needed.

7. TROUBLESHOOTING

If you encounter any issues with your iATOM Johnny 5 Robot, consider the following:

- **Robot not moving:** Check if the robot's battery is charged. Ensure the remote control has fresh batteries and is properly paired with the robot. Verify all connections are secure.
- **Remote control not responding:** Replace the remote control batteries. Re-pair the remote control with

the robot.

- **Missing parts during assembly:** Refer to the 'After-sales Service & Guarantees' section for assistance with missing components.
