Degrees of Comfort Electric Heated Blanket Queen Size

Degrees of Comfort Electric Heated Blanket Queen Size Instruction Manual

Model: Electric Heated Blanket Queen Size

INTRODUCTION

Thank you for choosing the Degrees of Comfort Electric Heated Blanket. This manual provides essential information for the safe and efficient use of your new heated blanket. Please read all instructions carefully before use and retain this manual for future reference.

This Queen size electric heated blanket features dual controls, 6 heat settings, a 10-hour auto shut-off, and overheat protection for a comfortable and safe experience. It combines luxurious flannel and soft Sherpa for ultimate coziness.

The diagram shows a cross-section of a blanket with three distinct layers. Layer A is the top layer, a thick, textured flannel. Layer B is the middle layer, containing a grid of fine heating wires. Layer C is the bottom layer, a smooth resin protection layer. Dashed lines with circular markers A, B, and C point to each layer respectively.

SETUP INSTRUCTIONS

- 1. Unpack the Blanket:** Carefully remove the heated blanket from its packaging. Ensure all components, including the blanket and two controllers, are present and undamaged.
- 2. Position the Blanket:** Lay the heated blanket flat on your bed, ensuring the heating wires are evenly distributed and not bunched up. The blanket should be placed directly on top of your mattress or fitted sheet.
- 3. Connect the Controllers:** Locate the connection ports on the blanket, typically near the bottom corners. Each controller has a connector with an arrow. Align the arrow on the controller connector with the arrow on the blanket's port and push firmly until it clicks into place. For Queen size blankets, there are two controllers for dual-zone heating.
- 4. Plug into Power:** Plug the power cords from each controller into a standard 120V AC electrical outlet. Avoid using extension cords or power strips.

OPERATING INSTRUCTIONS

1. **Power On/Off:** Press the power button on each controller to turn the blanket on or off. The LED display will illuminate when the blanket is active.
2. **Adjust Heat Settings:** Use the temperature control buttons (up/down arrows or similar) on each controller to select your desired heat level. The blanket offers 6 heat settings, allowing for personalized warmth.
3. **Set Auto Shut-Off Timer:** Press the timer button on the controller to cycle through the available auto shut-off times. The blanket features a 10-hour auto shut-off for safety and energy conservation.
4. **Dual Control Functionality:** For Queen size blankets, each side has an independent controller. This allows two users to set their preferred heat level and auto shut-off time without affecting the other side.

MAINTENANCE

1. **Disconnect Power:** Always unplug the blanket from the wall outlet before cleaning.
2. **Detach Controllers:** Disconnect both controllers from the blanket by pressing the release buttons on the sides of the connectors and pulling them out.
3. **Machine Wash:** The blanket is machine washable. Wash on a gentle cycle with cold water. Do not bleach or iron.
4. **Tumble Dry:** Tumble dry on a low heat setting. Ensure the blanket is completely dry before reconnecting the controllers and plugging it back in. Do not dry clean.

TROUBLESHOOTING

- **Blanket Not Heating:**
 - Ensure the power cords are securely plugged into both the blanket and the wall outlet.
 - Check if the wall outlet is functional by plugging in another appliance.
 - Verify that the controller is turned on and a heat setting is selected.
- **Overheat Protection:** The blanket is equipped with an overheat protection system. If the blanket becomes too hot, it will automatically shut off. Unplug the blanket, allow it to cool down for a few minutes, and then try turning it on again.
- **Controller Display Not Working:** Ensure the controller is firmly connected to the blanket and the power cord is plugged in. If the issue persists, try a different outlet.
